## PROJECT INFORMATION

## PROJECT STATUS &amp; SYSTEM NOTES

**1/17/2017** - The construction funding application is currently under review by the DFA. It is predicted that a FA may be executed as soon as April or May 2017 barring any unforeseen issues. **11/3/2016** - Meeting between SRWCB and the water system to discuss a revised scope of work for the planning project. More emphasis will be put on drilling 3 shallow test wells. **8/16/2016** - CRWA submitted a completed feasibility study FFAST application for treatment or a new well on 8/15/2016. **4/8/2016** - Funding application is nearly complete. **2/22/2016** - DE states that a revised COM is "NOT ADVISED, THEY HAVE NOT COMPLETED A FEASIBILITY STUDY NOR HAS IT STARTED YET (OF NO FAULT OF THEIR OWN - IS DUE TO FUNDING SNAFUs). METER PROJECT WILL COME FIRST BEFORE FEASIBILITY. 2018 MIGHT BE A GOOD DEADLINE FOR FEASIBILITY STUDY TO BE COMPLETED". **1/21/2016** - A funding application "kick off" meeting was held on 12-28-2016 to discuss necessary items that need to be covered to complete the application. John Wendele with CRWA will be assisting the water system with the application. Project alternatives that were discussed were: test wells, pilot testing for adsorptive media, coag. / filtration (if needed) and possible consolidation with Colusa Industrial Park.

8/3/16: Water system is evaluating potential consolidation with another PWS. 6/24/2016: Construction will be able to completed by the end of the year. 4/29/16- LPA Received New Well Project SRF 14C107 Plans and Specifications for Review. Water System is soliciting contract bids for well construction. 1/29/16- LPA Received New Well Project SRF 14C107 Plans and Specifications for Review. Water System is soliciting contract bids.

4/29/2016: System was issued a new Compliance Order in April 2016. 3/7/2016: System will be issued new Compliance Order by the end of the month. 12/11/2015-The water system plans to complete pilot testing for POU alternatives by June 2016.

RTC DATE	RTC BASIS	EPA NOTES	Not Likely to meet work plan deadlines	Cong. Dist.
		<p>PWS does not seem likely to meet July 2018 RTC. What additional measures can be comitted to mitigate the protracted RTC?</p> <p>Further, DFA should enter the status of the funding application.</p>	X	
		<p>Please clarify if the proposed solution has changed. If so, a revised compliance order will be necessary to ensure the systems remains on the path to compliance. If not, what are the reasons that the system missed their RTC date.</p>		CA03
		<p>What is the proposed solution and what is the time frame for necessary activities, including the new antificated RTC date.</p>

Yes	4/1/2015	4/1/2018

**11/17/2017:** No changes reported. **9/6/2016:** Gold Beach Park tested a well on their property for arsenic that is currently used to supply water to a storage tank in case of a fire. This well was tested in February 2016 for arsenic and it was found to have an arsenic level of 2.6 ug/L. Gold Beach Park has not been responsive to compliance orders issued to it. A new compliance order has been drafted by the LPA and was reviewed by the DE on 9/6/2016. Unknown when the compliance order was issued to the water system. Issued a COM on 9/10/2015, but they may still need to issue a citation with fines. **6/27/2016:** Water system is not complying with compliance order that was issued 9/2015. Wendy spoke with LPA on 6/27/2016 to discuss the possibility of re-issuing an amended com and/or issuing a citation with fines for their non-compliance. Not receiving any PN for the arsenic violation and don't believe they are issuing Do Not Drink notices. Last sample was collected on 1/26/2016 - 18 ug/L. **1/13/2016** Water system has been notified to test arsenic levels in a second well on the property. If the water system does not conduct water testing for arsenic on its own, El Dorado County EMD will complete water testing for arsenic levels for the second well on the property to see if it can be used as the main water source for Gold Beach Park. **12/4/2015**-System is proposing blending from alternate sources to reduce arsenic levels below MCLs. EDC is waiting for water quality test results to determine if blending is a feasible option. Well#2 tested for arsenic levels on 2/10/2016. Arsenic levels in the possible alternate well were 2.6 ug/L. Gold Beach Park is now required to test Well #2 for other water quality constituents including organic chemicals, inorganic chemicals, secondary standards, etc. Testing results are still pending as of 4/15/2016.

**12/7/2016: Pending pump test and water quality samples from the newest well.** **11/17/2016:** Miller's Hill School is developing a plan to characterize nitrates in their newest well. **9/6/2016:** Per Stantec Engineering, the company performing work at Miller's Hill School, the construction project for Miller's Hill School began in September and was put on hold by the California Division of State Architecture from December 2015 to June 2016. Construction has re-started and is nearing completion. The project includes installing a shutoff valve Well #4 (the well with consistently high arsenic levels) to remove it from the potable water supply and converting it to an irrigation well. Potable water is currently provided by Rimrock Water Company of Placerville, CA. I am meeting with the school Superintendent and Stantec construction to discuss the current status of their water supply. **8/2016:** Wendy and DE has been advising the LPA to have the school inactivate Well #4 and use it for irrigation only. The LPA is still evaluating whether the school will seek blending or inactivate Well #4. 6/14/2016: Latest tests show 6.7 arsenic level for well #4. RAA is not below MCL yet. **2/5/2016**-Well #4 is the well that has arsenic values consistently above the arsenic MCL. However, Miller's Hill School has been providing bottled drinking water to students and staff since 2014. The latest CCR report states "All staff and students are drinking only bottled water provided by the school" and "Miller's Hill School has received Prop. 84 funding to replace the drinking water well and associated infrastructure". I called Miller's Hill School today and they are preparing a statement for me that details when the school switched to bottled drinking water. Miller's Hill School is still providing bottled drinking water for students and staff as of 4/15/2016. **12/9/2015**-Per Gary Chan, the construction began in September. Recently, the Division of State Architecture (DSA) contacted the School District and requested to stop the work. It appeared the School District didn't get the approval from DSA when construction began, and DSA is requesting the Plans and other documents to conduct appropriate review. The School District's engineering consultant is preparing the documents for DSA review and requesting a timeline, so we can estimate the stop work timeline. **12/4/2015**-School is currently providing bottled drinking water from an approved source for students and staff at the school. School has contracted with an engineering firm to locate and drill a new well. Funding is handled by the state; LPA does not know the status.

--	--

What is the proposed solution and what is the time frame for necessary activities.

--	--

Needs an RAA update in column R. Can the arsenic violation be RTC'ed?

Yes	9/24/2015	9/24/2018

**2/6/17 update:** DDW has accepted only one of two wells (Well PW3 accepted, Well PW4 rejected due to turbidity issues and failure to meet bid specifications). DFA PM working to obtain additional P84 funds to drill another well to same specifications as Well PW3. **12/12/2016 - Water system is working with well driller to complete two production wells. There are quality issues with the wells and the parties are working out the details.** **11/7/16 update:** Well driller approved to continue development of two completed wells to improve quality and to retest. **8/16/16 update:** Both wells constructed, but there are construction defects that are being addressed by the consultant with the well driller. One well has ND arsenic, the other 28 ug/L, based on a single sample during well development. Wells were out of vertical alignment and produce significant turbidity. If redevelopment does not result in reduced turbidity, wells may have to be rejected. **OLD UPDATES: 3/4/2016:** This system is under court ordered receivership and the court is monitoring progress toward compliance. Additionally, there are two construction projects underway to correct the arsenic MCL violation and provide a new distribution system. As such, issuance of another CO with compliance deadline is not deemed necessary by the DWFOB District Office. **9/24/15** P84 FA executed for well construction. **1/12/16 update:** DFA approved award of well construction bid. **5/4/16 update:** one well constructed, the other underway. Anticipate equipping by end 2016, with operation approved in Spring 2017.

**2/6/17 update:** POU pilot study completed; Pure Blue H2O selected as POU for systemwide installation. DDW waiting for permit application and POU plans prior to approval to conduct installations. **11/7/16 update:** DDW developing response for re-evaluation of PWS classification; **8/16/16 update:** Citation with rescindable fines issued 5/16/16. CAP submitted by WS on 6/24/16. Fines rescinded on 6/27/16. WS is requesting re-evaluation of their PWS classification as a CWS (mostly seasonal usage second homes). **OLD UPDATES:** Water system evaluating alternatives. NOT using state funding. **9/17/15 update:** System consultant contacted DDW on 8/28/15 inquiring about POU piloting for compliance. Provided POU Guidance; **11/4/15** Sent letter advising WS of past due deadlines related to CAP submittal. **5/4/16 update:** draft Citation with rescindable fines prepared for failure to comply with Order.

**2/6/17 update:** AdEdge arsenic removal system selected for centralized treatment based on vendor evaluation of O&M costs. Water Sysem proposes installation by end of 3rd Q 2017. **11/7/16 update:** No change in status. **8/16/16 update:** WS continuing proposed arsenic sampling study. **6/14/2016:** Data is being obtained for 4th Q 2015. During 1st Q 2016, the operator found Wells 2&3 electrical controls had been damaged, and hence wells were inoperable. Samples could not be collected, and no M/R violation will be issued since the wells were inoperable. We have been advised that samples have been collected for the 2nd Q 2016, and results are pending. 1stQ2016 reslt for Well 1 was ND, potentially due to the pumping status of the well. Specifically, the operator is studying the possibility that the arsenic concentration reduces with pumping.

Schedule:

May - July 2016: Arsenic Sampling Study (testing arsenic during pumping cycle to evaluate changes in concentration)

August: Treatment design pending results of study will entail either a blending tank & controls or AdEdge Filtration Treatment.

December 2016: Compliance via installation of equipment (treatment or blending tanks)

**OLD UPDATES:** Water system evaluating alternatives. NOT using state funding. **9/17/15 update:** System procuring experienced engineering services to propose alternatives for centralized vs. POU treatment. **12/15/15** CAP presented at office meeting. DDW comments sent to ws via letter dated 12/17/15. Proposal is to work with P&P Engr Consulting to evaluate alternatives. **5/4/16 update:** met with water system & consultant on 4/4/16 to discuss CAP compliance and proposals for evaluation of arsenic treatment. Water system is on a path to compliance.

Which well (3 or 4) had ND arsenic? Does the September 2018 project completion date reflect a new well in lieu of Well 4?

What deadline was established for the PWS to submit permit application and POU plans?

Recommend a revised order to keep PWS on the path to compliance. System is in jeopardy of not RTC by 2ndQ 2018.

**2/6/17 update:** System submitted letter proposing alternate compliance plan using POU. Pilot study protocol and POU Plans provided with letter. **11/7/16 update:** System will be submitting request for POU piloting soon; **8/16/16 update:** No change in status **6/14/2016:** The system is evaluating the installatin of ArsenX as POE treatment . They plan to have the POE installed and operational by the 12/31/16 deadline. **7/31/15 update:** 4QRAA = 14 ug/L. Agree that revised CO is appropriate. Draft revised CO prepared 7/31/15. **9/17/15 update:** Revised CO issued 8/5/15 with compliance deadline of 12/31/16; **10/28/15** CAP meeting at DDW office proposing use of ArsenX POE. **5/4/16 update:** No change.

**2/6/17 update:** POU proposed in quarterly progress report. Working with Culligan for proposed POU system. **11/7/16 update:** No change in status. DDW evaluating compliance status with CO and will take appropriate followup action. **8/16/16 update** (NEW CO issued 3/24/16) CO issued based on single samples collected in 2013, 2014 and 2015, all results exceeding the arsenic MCL. WS has had signifcnat failure to monitor quarterly. CAP approval dated 7/19/16 requires Q monitoiring.

**2/6/17 update:** CCV submitted letter in support of consolidation with FCSA 32. FCSA 32 has begun developing a consolidation agreement under the DWSRF Planning Study. **11/7/16** No change in status. **8/16/16 update:** Funding agreement issued to FCSA 30/32 on 8/9/16 for planning to evaluate groundwater for FCSA 32/Cantua Creek. CCV still proposes to consolidate with FCSA 32 as part of the construction project. **6/14/2016:** Proposed solution is now evaluating groundwater for the Cantua Creek community. New funding agreement to change the scope of the planning study is under development, and should be issued in the next month or two. That project would have an 18 month timeline, and would include a test well and design of two completed wells and distribution system. DWR may be funding distribution system replacement separate from the DWSRF project. **OLD UPDATES:** We believe this system will participate in a consolidation project currently in an SRF planning study by FCSA #30 & 32 (1000019 & 1000359) **9/17/15** met with Fresno Co special districts regarding the FCSA 30/32 project on 9/11/15. Project includes consolidation of CCV with FCSA 30/32 system, and creation of a new CSA to cover expanded service area. **1/12/16** No change in status; **5/4/16 update:** No change in status.

**2/6/17 update:** Phase 3 is out to bid, to be awarded in February 2017. **12/12/2016- Project is on schedule. Water treatment phase is being advertised.** **11/7/16 update:** No change in status - project continuing per schedule **8/16/16 update:** Funding agreement amended 4/25/2016 to extend deadline for project completion to 3/21/18. Arsenic treatment soon to go to bid; **6/14/2016:** the RTC date of 3/21/2018 is not in the 2009 compliance order. **5/11/15 update:** Pilot study completed and arsenic treatment vendor selected.. Design of treatment underway. **7/29/15 update:** Well 6 approved to operate with initial arsenic at 9 ug/L. Blending with existing high arsenic wells. As pilot completed & DDW approved selection of treatment by letter dated 4/22/15. Design underway. Project FA provided deadline of 3/22/16 for completion, however CCSD will be requesting extension. It is estimated that project will be completed and treatment online by September 2016. **9/17/15 Update:** No Change; **11/16/15** phase 1 of construction project completed. **3/4/16 update:** FA extension request submitted by Caruthers CSD on 12/11/15 to provide 2 additional years to complete construction project. DFA is in process of issuing FA amendment. **5/4/16 update:** Funding agreement amendment A-1 executed 4/25/16 extending time to completion of project to 3/21/2018.

Recommend a revised order to keep PWS on the path to compliance. System is in jeopardy of not RTC by 2ndQ 2018.

X

What deadline was established for the PWS to submit permit application and POU plans?  
What is the timeframe for the FCSA 32 consolidation project?  
Will system RTC by 7/1/2017?

N/A	N/A	N/A
No		

2/3/17 - system continues to submit quarterly updates per their citation. They only need 2 more POU devices installed to achieve 100% compliance with active service connections. 7/22/16- Keeler now has a D1 certified operator and is looking for a T1 operator to hire. They are maintaining their POU units and sending the LPA monthly reports. They now have 40 POU devices installed out of 43 active service connections. POU results are still ND. 4/22/16-New Board Members are addressing compliance order timeline. 2/5/2016-Approximately 40-50 POU's installed out of 80 service connections (service connection capacity max. not all lots are occupied). 3-5 samples are collected per month, so every unit is sample 1/yr.; results are ND and no spikes have been detected due the county requiring the filters to be changed out annually; problem is that the board quit in December 2015 and so currently there is not certified operator. Funding agreement needs a signature to be executed and the Board; quarterly source sampling is still be conducted; PN is being done quarterly. 11/20/2015-The 300k funding agreement was for centralized treatment alternatives with costs research, and drilling a test well to see if they can get a well with less arsenic. The KCSD Board failed to sign the agreement. Sean's office might have more info on where they are in the process and if they are still eligible for this funding package – probably not, because it's been several years now. Every POU device is tested annually and results have been ND. Although they use the Isolux POU devices and media which have not been NSF 53 approved. The majority but not all homes have devices. Previous centralized treatment funding project for this system was rejected because the system could not afford to pay the high O&M costs for centralized treatment. Maybe they need another funding project that would install approved POU devices at the homes that would allow it and then POE on the service connections that won't allow a POU. That way they have 100% compliance and approved devices. But don't know if we should wait for the new POU/POE regulations??? So we continue on with what we have right now. They distribute a quarterly public notice that states the arsenic violation info and what the water quality numbers are at for the well, and the CCR shows both the raw well water data and the POU data. System is currently collecting every POU device annually spread out over the year.

**12/12/2016 - No funding updates** 12/16-second office hearing on 11/30/16 for updated CAP from the system. Expecting an update by end of 12/16 for updated timeline and funding options for compliance. 9/6/2016: A revised CAP was submitted (7/19/16). The Water System is planning to conduct cycle tests on the well and determine depths of arsenic and the potential installation of a packer to isolate arsenic zones. The Water System also plans to evaluate POU as another potential option 6/16- system given until 7/15/2016 to provide new CAP since they will be not connecting with Vaughn for now. 10/15-Looking into possible blending with Brock MWC which exceeds nitrate and is adjacent to Maher. Both systems are under CO to fix problems - both just pulling out of the Vaughn Const. project due to loan offer instead of grant. Systems did not get DAC status.

Is there any possibility  
that the LPA can apply  
pressure to complete  
the last 2 POU  
installations in lesss  
than the remaining 18  
months?

What is the proposed  
solution and what is  
the time frame for  
necessary activities.

02/06/17 (JSD): Under Prop 1 technical contract, Self Help Enterprises is working with the water system to complete a funding application for the planning project. 11/09/16 (JSD): Due to RCSD's concerns about the O & M cost of the consolidation pipeline and issues related to getting easement for the pipeline, consolidation of Lands of Promise is no longer part of the RCSD regional consolidation project. LOP is going to complete a separate planning application via FFAST which will include evaluation of other alternatives in addition to consolidation with RCSD. 08/03/16 (JSD): During phase 1 of the RCSD's regional consolidation project (expected to start in 2017), other alternatives (new well, treatment, etc.) including consolidation will be evaluated to select an alternative for construction. RCSD has expressed concerns over the O & M cost of the long consolidation pipeline to Lands of Promise. 6/10/2016 (NJG) - SWB OCC will be consulting with Kern County's legal counsel about funding agreement terms and conditions. They continue to have liability concerns and it is unclear how long the negotiations will take. County is a third party to the project and is only acting as a mechanism to route grant funds. County does not own or operate the water system. RTC date is unclear. 04/28/16 (JSD): The State Board soon plans to issue a funding agreement to Kern County to administer the P84 funding project. 04/28/16 (JSD): Review of draft plans and specs on hold since they are incomplete. Draft PDR3A was approved by letter dated December 1, 2015. Test Well Completion report was approved by letter dated April 13, 2016. Amendment to Funding Agreement to extend the planning project completion date to December 31, 2016, issued to Rosamond CSD on April 25, 2016; waiting for RCSD to return the signed amendment to the State Board. 01/16 (JSD): Draft plans and specs for the consolidation project received on Dec. 31, 2015; the District office plans to complete review of the plans by early February 2016. Project time extension to July 2016 is under consideration by DFA. 10/05/15 (JSD): Rosamond CSD has completed drilling of a test well to address its hexavalent chromium problem; water quality results of the test well are awaited. Draft PDR of the design of consolidation pipeline of small systems has been received and is under review by the DDW. Deadline for completion of the planning project is January 22, 2016. Part of Rosamond CSD Regional Consolidation P84/SRF Planning Project.

What is the proposed solution and what is the time frame for necessary activities.

02/06/17 (JSD): Due to issues with legal easement to approach the wellsite, the project is currently on hold. Meetings between BLM, DDW, and DFA have been scheduled to help resolve the access issues, 11/09/16(JSD): Drilling of Test Well Nos. 2 and 3 was completed in October 2016. Initial water quality results indicate that Test Well #3 would be a viable source of supply with satisfactory water quality. A pump test will be soon conducted to determine yield of the well. 08/03/16 (JSD): BLM has recently given approval to drill the test wells; the wells are expected to be drilled by the end of this year and target is to complete the P84 planning project by April 16, 2017. 04/28/16 (JSD): NV5 and Hungry Gulch are working with BLM to acquire easement to drill test wells; application has been submitted to BLM. Funding agreement has been amended to extend the completion deadline to April 16, 2017. 01/19/16 (JSD): Due to excessive cost of purchasing the land from the private property owner and not having the option of buying the easement, DFA and DDW stopped NV5 to pursue this option. DDW is in contact with BLM to check if BLM would allow to drill on its land; BLM is developing a guidance document for allowing drilling wells on its land and the document is in the process of being finalized and is expected to be available by the end of February 2016. Current P84 funding agreement expired on 12/31/2015; DFA will consider extending the funding agreement if there is a solid option to pursue. 10/05/15 (JSD): NV5 Engineer is Negotiating with the property owner to answer his questions and develop an easement agreement for the proposed test well. If an agreement with the property owner is not developed soon and a test well can not be drilled, the P84 feasibility project may need to be ended since the current project completion date can not be extended beyond December 31, 2015. The water system may then need to submit a new DWSRF funding application using FFAST. 5/29/15 (JSD): Funding agreement of Hungry Gulch MWC P84 planning project amended on 2/09/15 to extend completion deadline to June 30, 2016. P84 planning project in progress with a completion deadline of February 13, 2015. Funding agreement is being amended to extend completion date to December 31, 2015.

02/06/17 (JSD): Negotiations between DFA and NEWD to restart the funding project have been unsuccessful. DDW plans to issue a new compliance order to NEWD to establish a deadline to comply with the arsenic MCL. 11/09/16 (JSD): Sunset Apartments is part of the NEWD P84 construction funding project. Discussions between DFA and NEWD are in progress to discuss completing the project. A new funding agreement will be issued by DFA to NEWD depending upon the outcome of the discussions. 08/03/16 (JSD): In July 2016, SWRCB-DFA issued a letter to NEWD about termination of the P84 funding agreement that expired in May 2016. Waiting for response from NEWD to complete the arsenic improvement project. NEWD's attorney has contacted the SWRCB to inquire funding for connecting Sunset Apartments to NEWD without first completing the arsenic project. 04/28/16 (JSD): In a recent email communication April 2016, Attorney General's Office has approached NEWD to restart the construction project and complete the construction. 01/19/16 (JSD): Construction project is on hold due to litigation between NEWD and contractor, Clarke Bros., Inc. 10/05/15 (JSD): Due to litigation between NEWD and contractor, the construction project is on hold. 5/29/15 (JSD): Per 5/8/15 email communication with Dollie Kostopoulos, NEWD has filed a cross complaint against the contractor to use the money from the Bonding Company to restart the construction. Part of North Edwards Water District's P84 construction funding project; 40% completed. 1/30/15 (JSD): Since November 2014, construction work is on hold due to disputes between NEWD and contractor. The contractor has filed a law suit against NEWD. NEWD and engineer AECOM working to figure out a solution.

At what point does this legal issue become unreconcilable? At what point does this DDW tell this system to find another solution?

Will an order to NEWD be enforceable against Sunset Aprtments?

02/06/17 (JSD): Interim approval to use the newly drilled wells (Well 03 and 04) was given on June 7, 2016. The RAA value for the 4th quarter is 9.9 ug/L. After one more quarter of RAA below the MCL, the water system will be returned to compliance (expected after March 2017). 11/09/16 (JSD): P84 construction funding project has been completed. Project completion documents are under preparation by DFA. Two new wells are successfully running. The water system is expected to be in compliance with the arsenic MCL after the 4th quarter of 2016. 08/03/16 (JSD): Construction project is over 90% complete. Interim approval to use the newly drilled Wells 03 and 04 was given on June 7, 2016. Expected to achieve full compliance with the arsenic MCL in the 4th quarter of 2016. 04/28/16 (JSD): Construction project is about 75% complete. 01/19/16 (JSD): Construction of the project is in progress; about 25% completed. 10/05/15 (JSD): First bidding of the project was not successful. The project was rebid on 9/29/15; waiting for a decision on the second bidding. 5/29/15 (JSD): P84 construction funding agreement executed on April 8, 2015 with a completion deadline of 3 years. P84 construction funding application received; plan to issue construction funding agreement before end of Feb. 2015.

02/06/17(JSD): RCSD has expressed concerns over the cost of operation of the William Fisher being significantly over the revenue and is planning to petition the court to be relieved of the receivership. DDW has identified a new receiver and will petition the court to appoint a new receiver. DDW plans to issue a new compliance order after the new receiver is appointed. No significant progress on arsenic MCL compliance since the last update in Nov. 2016. 11/09/16 (JSD): Due to RCSD's concerns about the O & M cost of the long consolidation pipeline and issues related to getting easement for the pipeline, consolidation of William Fisher Memorial Water Company is no longer part of the RCSD regional consolidation project. RCSD is the court appointed receiver of William Fisher and will evaluate other alternatives (including POU treatment devices) under a separate funding project. 08/03/16 (JSD): During phase 1 of the RCSD's regional consolidation construction funding project (expected to start in 2017), other alternatives (new well, POU treatment, etc.) including consolidation will be evaluated to select an alternative for construction. RCSD has expressed concerns over the O & M cost of the long consolidation pipeline to William Fisher. 04/28/16 (JSD): Review of draft plans and specs on hold since they are incomplete. Draft PDR3A was approved by letter dated December 1, 2015. Test Well Completion report was approved by letter dated April 13, 2016. Amendment to Funding Agreement to extend the planning project completion date to December 31, 2016, issued to Rosamond CSD on April 25, 2016; waiting for RCSD to return the signed amendment to the State Board. 01/19/16 (JSD): Draft plans and specs for the consolidation project received on Dec. 31, 2015; the District office plans to complete review of the plans by early February 2016. Project time extension to July 2016 is under consideration by DFA. 10/05/15 (JSD): Rosamond CSD has completed drilling of a test well to address its hexavalent chromium problem; water quality results of the test well are awaited. Draft PDR of the design of consolidation pipeline of small systems has been received and is under review by the DDW. Deadline for completion of the planning project is January 22, 2016. Part of Rosamond CSD Regional Consolidation P84/SRF Planning Project.

02/06/17 (JSD): A joint meeting between DFA, DDW and Cal Water is being planned in Feb. 2017 to discuss consolidation projects with Cal Water and pursue Cal Water to sign funding agreement on behalf of RS MWC. 12/12/2016-DFA attempting to negotiate with Cal Water to accept FA on behalf of RSMWC. 11/09/16 (JSD): According to DFA, Kern County has concerns about signing a funding agreement on behalf of RS MWC since RS MWC does not have proper legal formation documents. A conf. call was held on October 25, 2016 among DFA, DDW and RS MWC to discuss RS MWC becoming a legal entity. RS MWC has requested technical assistance to complete this item. DFA is looking into the funding mechanism to do this. 08/03/16 (JSD): Issuance of funding agreement is pending with the State Board; trying to address comments from the Kern County Counsel. 04/28/16 (JSD): The State Board soon plans to issue a funding agreement to Kern County to administer the P84 funding project. 01/19/16 (JSD): Due to various concerns of Kern County (mainly liability for cost increase), the issuance of funding agreement has been delayed. Plan to soon issue the revised funding agreement to Kern County and then discussions with RS MWC will start about taking responsibility to address the cost increases, if any. 10/05/15 (JSD): Final revisions to the funding agreement language are under review by legal; expected to issue the FA before end of Oct. 2015. 5/29/15 (JSD): P84 construction funding agreement issued in March 2015; revisions are being made to the language in the funding agreement. Due to RS MWC not having proper legal documents, P84 funding agreement has been issued to the Kern County on behalf of RS MWC.

02/06/17 (JSD): Negotiations between DFA and NEWD to restart the funding project have been unsuccessful. DDW plans to issue a new compliance order to NEWD and FTP to establish a deadline to comply with the arsenic MCL. 11/09/16 (JSD): FTP is part of the NEWD P84 construction funding project. Discussions between DFA and NEWD are in progress to discuss completing the project. A new funding agreement will be issued by DFA to NEWD depending upon the outcome of the discussions. 08/03/16 (JSD): In July 2016, SWRCB-DFA issued a letter to NEWD about termination of the P84 funding agreement that expired in May 2016. Waiting for response from NEWD to complete the arsenic improvement project. NEWD's attorney has contacted the SWRCB to inquire funding for connecting Fountain Trailer Park to NEWD without first completing the arsenic project to provide water with lower arsenic concentration than the Fountain Trailer Park well. Bottled water currently being provided under the CAA funding project may be discontinued if that happens. 04/28/16 (JSD): In a recent email communication April 2016, Attorney General's Office has approached NEWD to restart the construction project and complete the construction. As an interim solution bottled water is being provided to residents. 01/19/16 (JSD): Construction project is on hold due to litigation between NEWD and contractor, Clarke Bros., Inc. 10/05/15 (JSD): Due to litigation between NEWD and contractor, the construction project is on hold. A funding agreement from CAA funding was issued in August 2015 to provide bottled water as interim solution. Due to problems with the project administration and delivery of bottled water, the funding agreement is being issued to Self Help Enterprises now. 5/29/15 (JSD): Per 5/8/15 email communication with Dollie Kostopoulos, NEWD has filed a cross complaint against the contractor to use the money from the Bonding Company to restart the construction. Part of North Edwards Water District's P84 construction funding project; 40% completed. 1/30/15 (JSD): Since November 2014, construction work is on hold due to disputes between NEWD and contractor. The contractor has filed a law suit against NEWD. NEWD and engineer AECOM working to figure out a solution.

P84 test well drilled-connecting to Lamont PUD	

02/06/17 (JSD): Revised plans and specs for the regional consolidation project have been received; they are under review by the DDW staff with a goal to complete review by 02/15/17. 11/09/16 (JSD): draft plans and specs have been received and are under review by the District Office. Deadline for completion of the planning project is 12/31/16. A conf. call was held on 11/08/16 to go over the pending items to complete the planning project. 08/03/16 (JSD): Per email communication in July 2016 with GEI consultants, draft plans and specs are under preparation and will be soon submitted to DDW for review. Project completion deadline is 12/31/16 for the P84 planning project. 04/28/16 (JSD): Review of draft plans and specs on hold since they are incomplete. Draft PDR3A was approved by letter dated December 1, 2015. Test Well Completion report was approved by letter dated April 13, 2016. Amendment to Funding Agreement to extend the planning project completion date to December 31, 2016, issued to Rosamond CSD on April 25, 2016; waiting for RCSD to return the signed amendment to the State Board. 01/19/16 (JSD): Draft plans and specs for the consolidation project received on Dec. 31, 2015; the District office plans to complete review of the plans by early February 2016. Project time extension to July 2016 is under consideration by DFA. 10/05/15 (JSD): Rosamond CSD has completed drilling of a test well to address its hexavalent chromium problem; water quality results of the test well are awaited. Draft PDR of the design of consolidation pipeline of small systems has been received and is under review by the DDW. Deadline for completion of the planning project is January 22, 2016. Part of Rosamond CSD Regional Consolidation P84/SRF Planning Project.

**12/16- Will be connecting to Lamont (not Greenfield) -signed consolidation agreement with Lamont done.**

**Extension of Planning for one year completed.** 6/16-working on consolidation agreement. Develop plans and specs - one more year of planning - needs an extension. In addition will evaluation a connection to Greenfield. 11/15-working on consolidation agreement. Develop plans and specs - one more year of planning.

Since planning study  
has completed, new  
compliance order with  
specified RTC date  
should be issued.

@DFA, please update  
the funding  
information.

02/06/17 (JSD): Due to issues with legal easement to approach the wellsite, the project is currently on hold. Meetings between BLM, DDW, and DFA have been scheduled to help resolve the access issues, 11/09/16(JSD): Boulder Canyon is part of the Hungry Gulch MWC's funding project. Drilling of Test Well Nos. 2 and 3 for Hungry Gulch was completed in October 2016. Initial water quality results indicate that Test Well #3 would be a viable source of supply with satisfactory water quality. A pump test will be soon conducted to determine yield of the well. 08/03/16 (JSD): BLM has recently given approval to drill the test wells; the wells are expected to be drilled by the end of this year and target is to complete the P84 planning project by April 16, 2017. 04/28/16 (JSD): NV5 and Hungry Gulch are working with BLM to acquire easement to drill test wells; application has been submitted to BLM. Funding agreement has been amended to extend the completion deadline to April 16, 2017. 01/19/16 (JSD): Due to excessive cost of purchasing the land from the private property owner and not having the option of buying the easement, DFA and DDW stopped NV5 to pursue this option. DDW is in contact with BLM to check if BLM would allow to drill on its land; BLM is developing a guidance document for allowing drilling wells on its land and the document is in the process of being finalized and is expected to be available by the end of February 2016. Current P84 funding agreement expired on 12/31/2015; DFA will consider extending the funding agreement if there is a solid option to pursue. 10/05/15 (JSD): NV5 Engineer is Negotiating with the property owner to answer his questions and develop an easement agreement for the proposed test well. If an agreement with the property owner is not developed soon and a test well can not be drilled, the P84 feasibility project may need to be ended since the current project completion date can not be extended beyond December 31, 2015. The water system may then need to submit a new DWSRF funding application using FFAST. 5/29/15 (JSD): Funding agreement of Hungry Gulch MWC P84 planning project amended on 2/09/15 to extend completion deadline to June 30, 2016. P84 planning project in progress with a completion deadline of February 13, 2015. Funding agreement is being amended to extend completion date to December 31, 2015.

02/06/17 (JSD): same update as the fourth quarter of 2016. 12/12/2016- Construction application is being processed. 11/09/16 (JSD): P84 planning project has been completed. The water system is in the process of completing a construction funding application. 08/03/16 (JSD): Planning project is essentially complete. The water system is working on filing the construction funding application via FFAST. Environmental Review Unit of SWRCB is working on addressing the comments received on the environmental documents. 04/28/16 (JSD): Plans and specs are almost final. CEQA and NEPA documents being completed. Project completion deadline is 06/30/16. 01/19/16 (JSD): The funding agreement has been amended to extend the project completion date to 6/30/2016 and to provide some additional P84 funding. Additional time and funding required to address environmental review required by CEQA and NEPA. 10/05/15 (JSD): The funding agreement was amended to extend the project completion date to 12/31/15. 90% plans and specs were received on 9/30/15 and waiting for review by DDW. 5/29/15 (JSD): Preliminary design report for the project approved in May 2015. Plans and specs for a new well and blending treatment to be developed with a project completion deadline of 08/11/15. 2/13/15 (JSD): P84 planning project in progress with a completion deadline of August 11, 2015, per amendment issued in Dec. 2014.

Same comment for  
Hungry Gulch.

@DFA, please  
coordinate with DDW  
to ensure PWS submits  
necessary information  
to complete the  
application.

02/06/17 (JSD): Revised plans and specs for the regional consolidation project have been received; they are under review by the DDW staff with a goal to complete review by 02/15/17. 01/09/17: DDW is working on issuing a revised compliance order to Lucky 18 on Rosmaond, LLC. The new compliance order will be issued before 03/31/2017, with a compliance deadline of May 29, 2018. 11/09/16 (JSD): draft plans and specs have been received and are under review by the District Office. Deadline for completion of the planning project is 12/31/16. A conf. call was held on 11/08/16 to go over the pending items to complete the planning project. 08/03/16 (JSD): Per email communication in July 2016 with GEI consultants, draft plans and specs are under preparation and will be soon submitted to DDW for review. Project completion deadline is 12/31/16 for the P84 planning project. 04/28/16 (JSD): Review of draft plans and specs on hold since they are incomplete. Draft PDR3A was approved by letter dated December 1, 2015. Test Well Completion report was approved by letter dated April 13, 2016. Amendment to Funding Agreement to extend the planning project completion date to December 31, 2016, issued to Rosamond CSD on April 25, 2016; waiting for RCSD to return the signed amendment to the State Board. 01/19/16 (JSD): Draft plans and specs for the consolidation project received on Dec. 31, 2015; the District office plans to complete review of the plans by early February 2016. Project time extension to July 2016 is under consideration by DFA. 10/05/15 (JSD): Rosamond CSD has completed drilling of a test well to address its hexavalent chromium problem; water quality results of the test well are awaited. Draft PDR of the design of consolidation pipeline of small systems has been received and is under review by the DDW. Deadline for completion of the planning project is January 22, 2016. Part of Rosamond CSD Regional Consolidation P84/SRF Planning Project.

**1/17:** We have 5 quarters of sampling from well that exceeded the arsenic MCL. In addition, the system has been blending the two sources of supply in a storage tank before going to customers. The system has not been permitted for the blending, but the District will be working on a permit amendment for the blending treatment and require monthly treated sampling from the blending compliance point. 10/15-AR with Self Help working on submitting FFAST application for consolidation with East Niles. Well 3 went dry due drought so blending no longer an option 9/12-Consolidation agreement signed by Oasis. Planning ending 12/16. Easement agreements needed for project - Self Help working on easements and construction application. Submittal expected 4/2017.

**12/16-working with the City for consolidation - had mtg on 12/9/16. Public mtg scheduled for 2/17 with school.** 6/16 - Mandatory consolidation letter sent out 6/16. Solution will be consolidation with City of Bakersfield. Currently in planning study with 11/16 planning agreement deadline. Deliverables: plans and specs, enviro, consolidation agreement with City of Bakersfield. 10/15-test well does not meet arsenic or radiological MCLs - therefore, a new well will not be a viable solution. Meeting in late 9/15-DDW will be issuing a Pre-Consolidation letter for a consolidation with City of Bakersfield. If necessary, DDW will mandate consolidation with City of Bakersfield which was the original solution for the project. After new personnel at the City - the consolidation was cancelled due to a fear of losing Charter City status. Plans and specs for this alternative were already prepared (90%) for this alternative. Pre-Consolidation letter to go out in 10/15.

No current comment

Please clarify if the  
blended water is  
meeting MCL?

02/06/17 (JSD): Revised plans and specs for the regional consolidation project have been received; they are under review by the DDW staff with a goal to complete review by 02/15/17. DDW plans to issue a new compliance order before 03/31/2017.

**12/12/2016 - No funding updates as they are funding the installation of devices. The system estimates 5 devices/min. a year will be installed.** 6/16- completed piloting, Waiting for report on findings due 6/30/16. POU's will be self funded. 10/15-Piloting 2 POU devices in homes - planning to install POU devices on all 16 homes to meet Arsenic MCL.

02/06/17 (JSD): Revised plans and specs for the regional consolidation project have been received; they are under review by the DDW staff with a goal to complete review by 02/15/17. 11/09/16 (JSD): draft plans and specs have been received and are under review by the District Office. Deadline for completion of the planning project is 12/31/16. A conf. call was held on 11/08/16 to go over the pending items to complete the planning project. 08/03/16 (JSD): Per email communication in July 2016 with GEI consultants, draft plans and specs are under preparation and will be soon submitted to DDW for review. Project completion deadline is 12/31/16 for the P84 planning project. 04/28/16 (JSD): Review of draft plans and specs on hold since they are incomplete. Draft PDR3A was approved by letter dated December 1, 2015. Test Well Completion report was approved by letter dated April 13, 2016. Amendment to Funding Agreement to extend the planning project completion date to December 31, 2016, issued to Rosamond CSD on April 25, 2016; waiting for RCSD to return the signed amendment to the State Board. 01/19/16 (JSD): Draft plans and specs for the consolidation project received on Dec. 31, 2015; the District office plans to complete review of the plans by early February 2016. Project time extension to July 2016 is under consideration by DFA. 10/05/15 (JSD): Rosamond CSD has completed drilling of a test well to address its hexavalent chromium problem; water quality results of the test well are awaited. Draft PDR of the design of consolidation pipeline of small systems has been received and is under review by the DDW. Deadline for completion of the planning project is January 22, 2016. Part of Rosamond CSD Regional Consolidation P84/SRF Planning Project.

**12/16-installed 4 of the 16 POU devices. Plan to install POU devices and return to compliance.** 9/6/2016: The office hearing was conducted in Bakersfield on 10/1/15 and the system submitted a CAP which we received a revised and updated CAP on 10/8/15. The system was informally approved for CAA funds for the POU project. The system is still waiting on the formal agreement from DFA, but given approval to begin incurring expenses. The POU pilot devices (3 different types) were installed this last Monday on 8/29/16. 6/16 - XX. 10/15-Had CAP meeting 9/15, system submitted CAP. System planning on piloting POU for installation at all 16 SC

It is presumed that this PWS is part of the Rosamond consolidation project and the planning study is now completed. Since planning study has completed, new compliance order with specified RTC date should be issued.

What is the timeframe for the pilot study, does the PWS actually need another 18 months to install 14 more POU's?

@ DFA - please update the fungin columns for this system.

Did PWS meet the compliance targets?

02/06/17 (JSD): Construction work is in progress. 11/09/16 (JSD): After bidding, first phase (consolidation pipeline work) of the construction contract has been awarded. A pre-con meeting between QVWD and contractor was held on October 26, 2106. Construction work is expected to start shortly. 08/03/16 (JSD): The project is being bid in phases. The first phase of bidding is the consolidation pipeline between QVWD-Eastside and QVWD-Westside and the bid opening date is August 11, 2016. Bidding for the new well, storage tanks and treatment plant will be done later. 04/28/16 (JSD): Some final revisions to plans and specs being made to get the project ready for bidding in May 2016. 01/19/16 (JSD); Construction funding agreement has been issued with a completion deadline of 12/08/2018. Project kick off meeting was held in January 2016. Next step is bidding. 10/05/15 (JSD): It is expected that construction funding agreement will be issued before 10/31/2015. 5/29/15 (JSD): Technical clearance of the District sent to DFA on 05/06/15; waiting for issuance of P84 construction funding agreement. P84 planning project completed in June 2014; P84 construction funding application received in Jan. 2015. Application is under review by the District office and DFA.

02/06/17 (JSD): Revised plans and specs for the regional consolidation project have been received; they are under review by the DDW staff with a goal to complete review by 02/15/17. DDW plans to issue a new compliance order before 03/31/2017. 11/09/16 (JSD): draft plans and specs have been received and are under review by the District Office. Deadline for completion of the planning project is 12/31/16. A conf. call was held on 11/08/16 to go over the pending items to complete the planning project. 08/03/16 (JSD): Per email communication in July 2016 with GEI consultants, draft plans and specs are under preparation and will be soon submitted to DDW for review. Project completion deadline is 12/31/16 for the P84 planning project. 04/28/16 (JSD): Review of draft plans and specs on hold since they are incomplete. Draft PDR3A was approved by letter dated December 1, 2015. Test Well Completion report was approved by letter dated April 13, 2016. Amendment to Funding Agreement to extend the planning project completion date to December 31, 2016, issued to Rosamond CSD on April 25, 2016; waiting for RCSD to return the signed amendment to the State Board. 01/19/16 (JSD): Draft plans and specs for the consolidation project received on Dec. 31, 2015; the District office plans to complete review of the plans by early February 2016. Project time extension to July 2016 is under consideration by DFA. 10/05/15 (JSD): Rosamond CSD has completed drilling of a test well to address its hexavalent chromium problem; water quality results of the test well are awaited. Draft PDR of the design of consolidation pipeline of small systems has been received and is under review by the DDW. Deadline for completion of the planning project is January 22, 2016. Part of Rosamond CSD Regional Consolidation P84/SRF Planning Project.

02/06/17 (JSD): The POU arsenic treatment units have been installed and operational. DDW is in the process of permitting the facilities. After second quarter of 2017, the water system is expected to be in compliance. 11/09/2016 (JSD): Self funded POU treatment being installed, following completion of a POU treatment pilot study. Expected compliance date is end of 2016.

Please clarify that consolidation and treatment plant construction are scheduled to complete in 2018, not just the construction of the inter-tie. RTC and construction deadlines are incongruent. Please update accordingly.

**12/8/2016 - Phase 1 - Project complete. Closing out FA. Arvin is working on submitting a planning study for the additional 3 wells (site selection and drilling test wells) in addition to a construction application for the completion of those 3 wells.** 9/16-wells online - one well has elevated arsenic - on quarterly sampling. Applied for construction funds (Phase 2 of construction). 6/16-drilled 2 production wells, equipping and construction of transmission pipe. New EPA AO issued. Wells to be online later this summer. Need to find funding for 3 additional wells in Phase 2. 10/15-drilling 2 production wells, equipping and construction of transmission pipe. New EPA AO issued.

**02/06/17 (JSD): Draft test well completion report received in Jan. 2017. The test well shows arsenic > MCL.**

**12/12/2016- Test well drilling delays. Project is expected to complete in 2017.** 11/09/16 (JSD): Drilling of the test well is in progress and is expected to be completed before end of 2016. 08/03/16 (JSD): Updated draft of the plans and specs for the test well received on 7/28/16; expected to bid the test well in Sep. 2016. 04/28/16 (JSD): Boron CSD is in the process of signing agreement with the property owner to drill a test well and also working on the plans and specs for the test well. 01/19/16 (JSD): plans and specs for the test well are under preparation. Also searching for a location for drilling a test well; discussions with property owners underway. 10/05/15 (JSD): Waiting for test well to be drilled. 5/29/15 (JSD): PER approved in February 2015; waiting for test well plans and specs. Funding agreement will need to be extended to a new project completion deadline in 2016. SRF planning agreement issued with a completion deadline of July 27, 2015.

**12/16-Well 19 is on verge of exceeding the arsenic MCL with 3 quarters of RAA over the MCL, but need one more quarter. Well 12 has not been used at all as Well 19 is too high to blend with. Looking into treatment option - planning to apply for grant.** 3/7/2016: Lamont needs a one to two quarters of data before they can return to compliance. Approval for new well on 12/16/15 (Well 19). Well 12 was valved off the system and a new dedicated pipeline was constructed to Well 19 so that Well 12 and 19 will be blended. Blended plan was approved by District office on 2/8/16 and the system has not started using water from Well 12 that will be blended with Well 19 water. The system has not supplied high arsenic water to the system since December 2015. 10/15-Well will not come online until 11/15. Once online - system would be delivering water that meets arsenic MCL and they can RTC after 4 quarters.

11/09/16 (JSD): Review of updated environmental documents is in progress by BLM. The funding agreement was amended to extend the project completion deadline to December 31, 2016. The project is expected to be completed by Dec. 31, 2016. 08/03/16 (JSD): ERU of SWRCB and Rand CWD are working with BLM to address their comments on the environmental documents; the completion deadline is Sep. 30, 2016. 04/28/16 (JSD): The funding agreement is amended again to extend the project completion deadline to September 30, 2016, to allow additional time for environmental documents and comply with the BLM requirements. 01/19/16 (JSD): The funding agreement is being amended to extend the project completion deadline to June 30, 2016, to allow additional time for CEQA and NEPA. 100% plans and specs have been received; expected to review by mid February 2016. 10/05/15 (JSD): Development of the new well, pump test, and WQ testing conducted in Sep. 2015; waiting for the results. Draft PDR and plans and specs have been received and waiting for review by DDW. Planning project completion deadline is 12/31/2015. 5/29/15 (JSD): No change from 2/13/15. P84 planning project in progress; a test well has been drilled recently; waiting for the final test well completion report.

**2/1/17** - David Wallis from RCAC spoke to the Tribal EPA Director, Noah Ignacio on 1/24/17 and he is pending a response from the tribe to schedule a tribal council meeting this month, February 2017 to further discuss this project. **1/10/2017**: DE and LPA visited Tachi Palace on 12/2/16 and based on the review of the USEPA sanitary survey conducted on Tachi Palace and the visit, it appears that Central Union would be served water from a water system that is well operated, permitted and meets the Safe Drinking Water Act. DDW support this consolidation project. **10/31/16** Currently looking to see if consolidation with the Santa Rosa Rancheria is a potential long term solution for the school. A site assessment will be conducted by RCAC on 11/4/16 to further research this option and determine the extent of work required to consolidate. The SWRCB will also contact EPA to ensure the Rancheria has a regulated PWS that meets drinking water standards. **9/1/2016**: Central Union School is now in the queue to be assigned to a TA rep from CRWA and begin the planning stages for a permanent solution to their arsenic exceedance at the school. The LPA has been communicating with Elvira Reyes at SWRCB-DFA and indicating to her that the school will also need bottled water. They don't currently provide bottle water. The LPA will be attending the kick-off meeting at the school when scheduled. **7/29/2016**: AR request was submitted as indicated in previous update. Response by the state is currently pending. **4/12/16**: LPA conducted sanitary survey at the school. Delivered compliance order with RTC date of 7/2019. LPA will submit AR request to initiate funding application for bottled water and planning grant to assist the school achieve compliance by the proposed RTC date. **3/10/2016**: LPA is scheduled for a sanitary survey on 3/24/2016, by which they will deliver the revised compliance order with a RTC date of 3/2019. **12/1/2015**-Will conduct joint inspection with SRWCB in January 2015 to discuss RTC plan for the system. A revised compliance order will be issued at that time. Yes, the RAA for this system fluctuates in violating the MCL in some quarters and falling below it in others.

**2/1/17** - No status change from previous update. **10/31/16** - No status change from previous update. **7/29/2016** - LPA will mail correspondence to request update of POU research and installation. **12/1/2015**-Issued revised compliance order under the advice of SRWCB. Operator will investigate installation of POU-RO.

**2/1/17** - No status change from previous update. **10/31/16** No status change from previous update. **7/29/2016** - Installation of POU-RO units is not yet complete. **4/22/16**: No status change from previous update. **12/1/2015**-A revised compliance order was issued in September 2015. The operator has submitted a proposal for installation of POU-RO units at two centralized locations.

**2/1/17** - No status change from previous update. **1/10/2017**:water system is still at the same location so they remain non-compliant. They assured the LPA that they will move, but it is likely that they will remain at the site for the rest of 2017. Bottle water is provided to the employees.**10/31/16** No status change from previous update. **7/29/2016**: No status change from previous update. **4/22/16**: No status change from previous update. This system is under a two year timeline to relocate to a new site. They were bought out as a result of the speed rail project. Once at their new location, they plan to drill a new well. A revised CO will be issued to include the drilling of a new well as their RTC solution.

No current comment

6 months without an update. Last update stated LPA was requesting information from the PWS, the updates state that there have been no updates since. It is unclear if the PWS is being unresponsive.

What is the anticipated time frame to install the 2 POU devices?

**12/16-SWRCB meeting disussed project on 12/8 and FA should be following quickly in first Qtr. 2017.** 2/8/2016-the RTC date will be discussed at the 2/9/2016 EPA Region 9 Meeting. 10/15 - District will not re-issue Kettleman City a revised CO with deadlines at this time. They are installing a new SWTP that will treat water from the aqueduct – estimated construction 18-24 months. received grant funds from USDA for \$2 million additional money for construction. Environmental issues developed and identified by DFA ERU which will hold up the FA approx. 6 months.

**12/29/16**-LPA contacted the system operator, who indicated it was no changes in status since October 2016.

**10/6/2016**- Spoke with Alisa Morrison. The water system has applied for funding. Tony Morrison (water system operator) attended the Arsenic workshop on July 6, 2016. They have looked into treatment options (with Isolux Company) but determined it was too expensive (45-50K). Alisa Morrison stated that POE treatment will be too costly because of the additional testing that will be required. Lancaster Park MHP is continually looking into more affordable treatment options but so far have not found any. They are currently providing 5 gallon jugs of bottled water to their residents.

**10/6/2016**- Spoke with Fernando Rosas (manager). Fernando stated that Tony has been in contact with Cindy Cook regarding funding and treatment options. Fernando stated they are waiting for a list of approved treatment options. Once they obtain this list they will review it implement treatment.

**6/30/2016:** The water system operator has been consulting with Isolux Company for water treatment options for arsenic removal. They are also working with Cindy Cook with CRWA to apply for funding. They are attending Arsenic workshop on July 6, 2016 at Palmdale Water District to check for more treatment options. On April 7, 2016, LPA had conference call with Lawrence Sanchez from State Water Resources Control Board. As per the discussion, the water system operator has been told to contact Cindy Cook to get assistance for treatment options for Arsenic. No funding project at this time. The operator was provided the application and the contact information for Lawrence Sanchez, Associate Sanitary Engineer, to initiate the process. **2015:** New ownership as of 03/2015. The operator working with Cindy Cook, SRF Program Coordinator, for completing TMF. AR has been extended to 12/31/2015 at the request of Cindy Cook. No funding project at this time. The operator was provided the application and the contact information for Lawrence Sanchez, Associate Sanitary Engineer from State Water Resources Control Board, to initiate the process.

**12/29/16**-LPA contacted the system operator, who indicated that they installed flow meters, working with State on their funding, hiring engineers for further investigation to determine an appropriate equipment for their water system.

**10/7/16**- Received an email from Sandra Miloszar (President) who stated that they are in the same position. Mettler Valley Mutual submitted information to a contractor to design a filtration system and are waiting at this point. Sandra stated that she will email the name of the contractor once she is back in town. 10/8/16- Contractor information: Douglas Craver, Western Regional Sales Manager, AdEdge Water Technologies, LLC (480) 243-1824. 6/30/2016: Mettler Valley Mutual Water Company is working with Cindy Cook with California Rural Water association (CRWA) and an Engineer from NV5 for grant process. In June, 2015, the water system became a tax-exempt organization under Section 501(c) (12) and the funding is in financial stages. The water system is working with AdEdge Technology regarding different arsenic removal treatment systems. On April 7, 2016, LPA had conference call with Lawrence Sanchez from State Water Resources Control Board. As per the discussion, the water system operator has been told to contact Cindy Cook to get assistance for treatment options for Arsenic. Full SRF application submitted. District Office clearance 6/30/2014. The non-profit application has been submitted but needs to be updated by the State Water Resources Control Board. **2015:** Full SRF application submitted. **Referred to EPA -- EPA issued NOV on 10/17/2016. 7/25/2016:** No status change from previous update. **6/13/2016:** Well 8's latest arsenic concentrations was at 10 ug/L and 10.2 ug/L. The Company is planning to further reduce Well 8's production from 600 gpm to 400 gpm, hopely to lower asenic concentrations. Well 7 is not permitted yet, still waiting for SC Edison to hook up the power, initial arsenic sampling showed the concentrations was at 7.5 ug/L, it is too early to discuss its arsenic compliance. **April 18, 2016:** Well 8 was out of compliance with arsenic MCL in the first quarter of 2016. **January 11, 2016:** Well 8 was out of compliance with arsenic MCL in the fourth quarter of 2015, the Company will take another arsenic sample for Well 8 on January 12, 2016 to confirm the forth quarter's result of 21 ug/L. The new Well 7 is drilled, however, it is waiting for SCE to install new power line. **9/14/215:** the drilling of a new well, Well 7, is in progress. Enforcement History: May 23, 2008 - Notice Of Violation issued for violating Federal arsenic MCL. January 6, 2009, Compliance Order issued for violating arsenic MCL (this Compliance Order did not meet EPA's formal action criteria). April 18, 2012, Citation issued for failing to comply with arsenic MCL and following through with funding per the Compliance Order directive. February 2, 2015, issued Compliance Order for violating the arsenic MCL (this Compliance Order contains a RTC date). Current Plan: The Company modified Well 8 casing perforations and reduced its pumping rate from 1000 gpm to 600 gpm; this has recently brought Well 8 back into compliance. The Company plans to drill two new wells to replace Wells 1 and 3. It is hoped that the two new wells can tap into water with low concentrations of arsenic.

**2/6/2017:** Liberty high is not providing bottle water as the well is offline, therefore their current water is potable and not exceeding any chemical constituents. **10/31/2016 No status change from previous update 9/13/2016:** after discussion with DE and EPA, we will be RTCing this system after we get the date when the system physically removed the source from the distribution system. **9/8/2016:** Liberty High School has 2 sources. The North Well (LPA source 2000150-001) and the West Well (LPA source 2000150-002). The water system is utilizing the North Well to supply the water system since that source does not exceed the arsenic MCL. **8/3/2016** Water System considering consolidation with nearby water systems, i.e. MD 10 & Valley Teen Ranch.

**1/3/2016-** Water system is waiting for the Environmental Impact Report to be released in order to proceed with the consolidation project. System has requested assistance to complete their application for construction. They have a project under 2000506-001C (Pin No. 36233). To date they have only submitted the general package. **10/31/2016** No status change from previous update. **8/2/2016** No status change from previous update. **4/28/2016** No status change from previous update. **1/15/2016** Still waiting for 2015 Arsenic sample to come in. Still working on consolidation with Bass Lake Annex Mutual Water System.

<p>9/8/2016: FFAST Planning Application completed 3/22/2016; The water system is out of compliance with the arsenic MCL and uses the same source water as the Cedar Valley Mutual Water Company. Cedar Valley is currently working on an application for DWSRF funds to install a filtration system for removal of the arsenic. The Yosemite Forks Estates Mutual water system needs to submit an application for DWSRF planning funds and determine a mutually agreeable solution to ensure that the water delivered to the customers meets all of the primary and secondary drinking water standards. A meeting will be held to discuss expected outcome and challenges. Coordinate with Cedar Valley since only one treatment system will be built. An agreement will need to be made to construct and operate the treatment plant. Yosemite Forks Mutual water system will receive assistance with completing the required documents for the DWSRF application. Plan to submit SRF application beginning 2015 6/13/16 (JG): No application has been submitted and they are not currently working with DFA staff.</p>	yes

Some of the past comments seem to have been deleted. Not sure what past progress has been made for which there are no updates. EPA is concerned about the lack of regular monitoring M&R violation should be issued.

EPA is concerned that this system has not progressed considering the arsenic concentrations violate the original standard. The high arsenic is also a concern for seasonal usage.

EPA is concerned the lack of regular monitoring. M&R violation should be issued if it hasn't happened already.

FOR PROFIT, SRF NOT APPLICABLE	

**2/6/2017:** North Fork Union school is not providing any bottle water service. **1/3/2016-**The new funding agreement was approved. Amending the contract with the contractor because the scope of work has changed. **10/31/2016 No status change from previous update 9/8/2016:** Proposed treatments have been deemed not acceptable as permanent solution, as a result alternative treatments are being considered for the consolidation project. The water system is looking for acceptable treatment options that would qualify for funding. **8/3/2016:** There has been no updates on the water system. **6/29/2016:** District Engineer has notified the School that they could apply for bottled water but likely won't pursue it because they know that the long-term solution is in the works. **4/28/2016** No status change from previous update. **3/10/2016:** The system is consolidating with MD#8 North Fork water system. Madera County Environmental Health Division can suggest the school provide bottle waters to all staff and students. However, the school needs to update their Planning Agreement as their previous Planning Agreement expired. A new request has been sent to their contact Fred Faysal. **12/8/2015-LPA** contacted DE for DFA update. A meeting was held to discuss consolidation with MD #8A North Fork Water system

**10/31/2016** No status change from previous update **9/8/2016:** You are correct, this compliance order is a duplicate that was issued when the 3rd well exceeded the RAA for arsenic. The correct comply by date is 5/3/2019. I will amend the compliance order to include all 3 sources that exceed the arsenic MCL. Wendy has corrected the master spreadsheet. The water system has corresponded back to Madera County indicating they will comply with the directives of the compliance order. They are currently looking at POU as a possible treatment. **8/3/2016** Compliance Order is active because water system decided to keep wells active. Public Notification Provided. Change of Operator. In contact with new operator and he has hired someone to prepare a conceptual plan for obtaining compliance. **4-28-2016** 1Q2016 16; OVER THE MCL RAA, NEW COMPLIANCE ORDER ISSUED FOR WELL3 . **1-15-2016** Well 1 has been inactivated from the water system. The new well was supposed to bring the system back into compliance however the New Well 3 hypothetically best case scenario for the RAA is 10.4 ug/L even if the next quarterly Arsenic sample is 0 ug/L. So far results are as follows: 2Q2015 9.6 ug/L; 3Q2015 17; 4Q2015 15

		<p>EPA is concerned that there has been no progress for this system, and there are no interrim measures. The school declined bottled water citing that a permanent solution is in the works, however, the school has rejected all permanent solutions. The school's agrument does not seem to stand to reason. EPA recomends a revised CO with a clear and defined timeline to RTC.</p>	X
		<p>Considering the time-span of the MCL violation, this system should fully RTC per the workplan by 12/2018. Please consider interrim measures such as bottled water.</p>	X

<p>6/13/16 (JG): The County completed planning in 2015 and applied to DWSRF/Prop 1 through FFAST for construction 3/1/2016. Currently updating their environmental documents and getting updated financials to complete application.</p>	<p>Yes</p>
<p>6/13/16 (JG): Madera County has applied on behalf of VTR to consolidate them, the County is currently completing its Environmental document for the construction project, should have complete application by September 2016.</p>	<p>Yes</p>

			12/5/2015
			11/6/2016

**8/2/2016** No status change from previous update **4/28/2016** No status change from previous update

**8/2/2016** Awaiting for results. **4/28/2016** No status change from previous update.

**8/3/2016** 2016 4th consecutive Q out of compliance. **4/28/2016** 3rd consecutive Q out of compliance.  
**01/15/2016** Revised CO will be sent to water system because it was not sent in June 2015. Water system was in compliance for 1 quarter, but has been out of compliance 2 quarters now. Public Notice Provided to Employees. A second compliance order will be issued with new compliance deadline date.

		<p>Past updates appear to have been deleted.</p> <p>@DFA, has funding application been completed by the system? If not, please coordinate with DDW or LPA to apply pressure to system for more timely submittal.</p>
		<p>EPA is concerned as this system has the highest arsenic concentration of all systems. The latest update was from June 2016 stating that DFA was awaiting a completed funding applications. Past updates appear to have been deleted.</p>
		<p>There is no discussion of what the system is going to do to fix the problem. It appears that this sytem is making no progress towards returning to compliance. EPA recommends escalated enforcement.</p>

**1/24/2017: Project going out to bid so that the construction activities can commence.****12/8/2016** - working on updated Plans and specifications. May not meet project completion date. UPDATE: (4/25/16): Project was rebid and the contract for the various contracts should be awarded in the next couple of weeks. HWC is ready to move forward once the contracts are awarded. UPDATE (KDC - 9/29/2015) - Project out to bid but the bids came in over budget. Looking to rebid the project with a modified bid schedule to hopefully get the project completed within the allocated budget.

**12/8/2016** - Applicant is working bidding out the project. Updated 4/25/2016 - KDC: Project is underway. Some components of the new system are being bid with the Oakhurst/Sierra Lakes Project to make the projects more affordable.

**1/24/2017: POU devices installed at all five locations where domestic water is available at the facility. The permit was recently issued and the sytem will be returned to complinace once they have completed the arsenic monitoring at the effluent from the POU devices.** Updated 4/25/2016 - KDC Proposing to install a POU device at the Industrial Park for removal of the arsenic.

Updated 4/25/2016 - KDC Compliance Order issued. FF recently installed an RO unit at another facility and is planning to test the unit and then begin work on getting a similar unit installed at this location.

**1/24/2017: Updated operations plan received. Changes at the arsenic removal plant have resulted in lower arsenic levels in the effluent. This system will be returned to compliance in SDWIS.** Update 4/25/2016 - KDC: The System has worked with the manufacturer to optimize the arsenic removal treatment plant. The monthly arsenic test results have been below the MCL but the RAA is still over the MCL. The System anticipates having and RAA less than the MCL in the 3rd quarter of 2016. We should be able to return this system to compliance by the end of 2016.

2/3/17 - a public notice was distributed for the 1Q2016 reporting period, violations are in the process of being entered in to SDWIS for the previos reporting periods. It is unknown if the public notices for the remaining 3 quarters in 2016 were distributed. 6/20/2016: Back-up help couldn't find the public notice info for Mono Sierra East so we will have to wait till Jon gets back from medical leave in July. 2/2/2016-4Q2015 MCL violation entered into Envision. 12/11/2015-M&R violations is due to system not monitoring and lack of an operator. DE updated that SRF funding is being processed by funding coordinator and system is awaiting final funding package.

Yes	Estimated April 2017	Estimated Aug2018

<p>1/19/17-Construction end estimated Apr 1, 2018; system is investigating with elementary school whether bottled water should be provided.</p> <p>12/29/16-DE didn't identify whether the school is receiving bottle water. see funding section for DFA project status.</p> <p>11/14/16 - Bridgeport adopted rate increase in October, Need FA to begin construction. 7/26/16 - Revisions to final plans/specs need to be submitted. Status meeting, site visit scheduled for 8/2/16. 6/24/16 - One elementary school served. Exploring bottled water option for upcoming school year. 4/28/16 - FAAST application submitted Feb 2016. Final design, plans, specifications under review. Per DFA on 4/27/16, expect 6-12 months to issue construction funding agreement, begin construction Spring 2017. <b>1/29/16</b> - DO accepted preliminary engineering report on 11/18/15, Bridgeport is beginning water rate study and preparing to submit FAAST application in Feb 2016. <b>10/2/15</b> - DO is reviewing preliminary engineering report requested by compliance order. Bridgeport planning to submit FAAST application in Nov 2015</p>
<p>6/27/2016: SPCA WS- they said they were having difficulty with the regional sewer plant taking the waste so they are installing drying beds. 11/3/2015-Waiting to see if nearby system with installed treatment can resolve waste discharge issue</p>
<p>1/31/2017-treatment plant under 10 ppb since July 2016- changes in coagulant feed and backwash seem to be successful. 5/11/16-April finished water was 32 ppb so plant is still having issues with maintenance. 3/7/2016:they are tweaking their treatment process (updating software to better control backwashes and just added a coagulant feed. The new compliance date is June 30, 2016. If the upgrades don't work, then we will send another compliance order (or citation). 1/29/15- added chemical feed and upgrading software/controls to improve backwash- next few months will indicate if successful. 12/1/2015-Will work with engineer to determine why it's not working. 11/3/2015-treatment plant not working to drinking water standards.- was working for a few months, but started failing again.</p>
<p>6/27/2016: They want POE, which is not allowed for compliance purposes by our local ordinance. However, since the state is developing POE/POU regulations, Monterey county is considering amending the ordinance so this may become a viable option if they meet the criteria. 12/24/2015-The compliance order has been updated and the initial compliance plan is due December 31, 2015. System is looking into treatment</p>
<p>1/31/2017- Updated enforcement was issued. System has new superindendent who is moving forward with treatment system and who will start communication with Grange. 6/27/2016: System has indicated desire to stay on bottled water. Updated enforcement will be issued in July 2016 indicating bottled water is not long term solution. 5/11/16- Plans have been completted. Principal is interested in staying on bottled water so an updated compliance order is in process. 12/1/2015-The project is moving. Peter Haase at Fall Creek said he would deliver the Plans and CEQA documents by this week, but DFA has not received the documents yet. Back in September/October, the new Superintendent had concerns on the monthly operating costs and he was going to discuss with the School Board. Construction most likely it will be funded with DWSRF and/or Prop 1 money. 11/3/2015-engineered plans for full scale treatment plant completed. 6/1/2015-Pilot test completed and approved by state. Currently working on engineered plans for full scale treatment plant</p>

		No current comment
		It seems like the system is treating, however, still exceeding? Please provide a more current update.

6/27/2016: blending is no longer viable option since further testing showed the other well also is high in arsenic. The system missed deadline for compliance plan so enforcement is pending. 12/24/2015-The compliance order has been updated and the initial compliance plan is due December 31, 2015. System is looking into treatment. No recent TCR violations.

1/31/2017-treatment installed and start-up began in Jan 2017. 6/27/2016: they want to use Isolex and have hired engineer to design plans. Self funding.

6/27/2016: proposing POE's and system would fund.

6/27/2016: plan is delinquent so enforcement is pending.

6/27/2016: They may not meet the July 2016 date since they are very interested in POE/POU, which our county is just now considering so they need to do the cost analysis. We will reevaluate plans due date when we get the selected option. 2/24/2016: is not part of a disadvantaged community. They are self-funding their project by increasing rates or special assessment. Their first milestone is:

- July 2016- determine preferred alternative – consolidation or treatment.
- Jan 2018-develop plans
- June 2018-implement compliance option

12/24/2015-They submitted initial compliance plan in September. They are researching treatment and intend to self fund. They are working with a vendor and hope to be part of a treatment study.

6/27/2016: They are deciding between installing a new treatment plant or purchasing water from Washington School (next door and preferred option). Washington School is stalling on implementing treatment so updated enforcement is pending. 12/1/2015-Proposed solution has not been determined yet. 11/3/2015-treatment plant was working, but system removed treatment plant in July 2014 said too expensive to operate. New compliance order to be issued.

		Please provide a current update. EPA is concerned by the lack of regular monitoring. Recommend issuing M&R violations if that hasn't already happened.

DWSRF	
Owner submitted pre-application for state funding in 2010.	

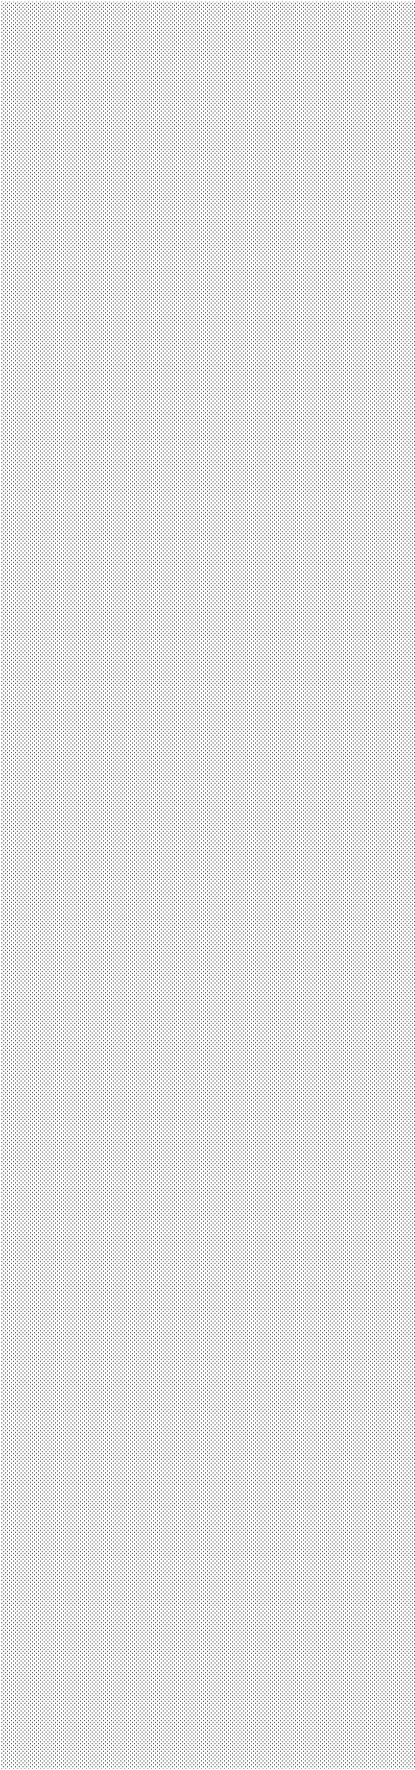

1/7/2015 Planning Application Submitted.	Agreement Number: D16-02012, Project Number: 3301380-001P, 7/1/2015 Application Deemed Complete. 8/31/2016 Draft Planning Funding Agreement sent to system.		

**11/1/2016** - Plumas Eureka CSD submitted a feasibility study for the planning loan project on October 28, 2016 that is currently under DDW review. The arsenic treatment pilot study protocol was reviewed and approved on 9/26/2016. The pilot study was started on 11/1/2016. The pilot apparatus was inspected by DDW on 11/4/2016. The planning project, although slightly delayed because the first pilot contractor pulled out of the project, is on a suitable schedule for compliance. **8/1/2016** - Plumas-Eureka CSD held a conference call with representatives from DFA and DDW on July 13, 2016. The discussion included a list of requested revisions to their SRF planning loan application that eliminated the intertie alternative and provided for appropriate CEQA documentation. The new consultant, FarrWest Engineering (Reno), was hired on July 13, 2016 to provide an alternatives analysis and PER to return to compliance with the arsenic MCL. DDW is revising a new compliance order to reflect a new schedule for deliverables because of the time needed to process the SRF loan application, but the final cease and desist date of November 2017 has not been revised.

**4/18/2016** - Met with the District board three times during the months from October 2015 to February 2016 to discuss the inadequate proposal and timeline for compliance. The submitted PERs did not describe adequate alternative analyses that included an intertie with a local community and the issues that may have been important to the proposed project of arsenic treatment, such as easements and rights-of-way. **9/22/15** - Lassen District Staff met with system and consultant. Some of pilot test data did not look like it applied to the system well. Looks like they won't meet 11/1/16 deadline. The system has submitted a proposal for additional piloting but it would not be completed until March of 2016. Preliminary estimate for a treatment plant is \$3M. In its evaluation of alternatives the system did not do a thorough evaluation of consolidation. A nearby (~ 1 mile) privately owned water system, Graeagle Water Company) with supply that meets standard that could be used to blend with high arsenic water. Reevaluation of possibilities by November 1, 2015. This appears to be the more cost effective project but an evaluation needs to be done. Estimate for treatment is \$3M. **7/1/2015** - The District Board will vote at their next meeting to approve its engineer to design the wellhead treatment systems and authorize the District Manager to act as the District representative to apply for SRF funding. The District is on track to meet its 11/1/2016 compliance deadline.

**1/12/17: No status change from previous update. 4/18/16:** No status change from previous update. **11/24/2015-** Saint Anthony submitted application at end of Oct 2015 for planning funding. Still has an assistance referral for TMF due in January. Owner has obtained a conditional use permit through Riverside County. A condition of the CUP is to provide centralized treatment prior to issuance of any building permits. The existing treatment station has been approved as an interim solution until centralized treatment is installed. This is a county code case. The LPA is working with other Departments to permit this park and obtain compliance. **10/25/16:** Please see notes on funding and planning section. **7/21/16:** Plans have been submitted for new distribution system. Treatment plans are pending. The LPA and our state DE would prefer that this system consolidate with Coachella Valley Water District (CVWD). **6/5/2015-** Tier 2 arsenic notifications issued quarterly. Well is sampled for arsenic quarterly. Saint Anthony MHP is an unpermitted park. Owner has obtained conditional use permit through Riverside County. A condition of the CUP is to provide centralized treatment prior to issuance of any building permits. The existing treatment station has been approved as an interim solution until centralized treatment is installed. Preliminary treatment plans approved by LPA. Owner of the park has applied for Prop 84 funding.

**1/12/17: No status change from previous update. 10/25/16:** Treatment plans approved 9/14/16. Condition of approval is that treatment system must be operational by 4/1/17. Tier 2 arsenic notifications issued quarterly. Well is sampled for arsenic quarterly. System is classified as a non-transient, non community.

No current comment

This system does not appear to have an enforcement order to keep them on the path to compliance.

X

Currently working with CRWA to submit FFAST application to State. 6/13/2016 (LPA): Water system is working with CRWA on FFAST application. Application is due by 8/31/16. 6-10-16 (DFA): Have applied for Groundwater funding for Chrom 6 problem in FFAST but no application for Arsenic in FFAST	Yes
12/7/2016- Water system is not pursuing state funding. (PETE) Corrective Action Plan due to LPA no later than May 2, 2016.	No
12/6/2016- DFA is providing Prop 1 TA through CSU Sacramento to complete the CEQA/NEPA work for the construction of an intertie with the Sacramento County Water Agency. Locke is in the middle of preparing their construction application. (PETE)	Yes

N/A	N/A	N/A
No	N/A	N/A

**1/12/17: No status change from previous update. 10/25/16:** FFAST application has been submitted. Still needs to be reviewed by State. **7/21/16:** Water system has contacted CVWD about consolidation. LPA contacted CVWD re: consolidation. CVWD states that this water system is interested in a master meter and they are in discussions with water system. Oasis Gardens is working with CRWA on a FFAST application to consolidate with CVWD.

**1/19/17:** water system has contacted both contractors about treatment options and also larger utility for connection estimate. **6/9/2016:** Water system has secondary well on site that they are going to test Arsenic levels to determine if that is below the MCL. Sample results due no later than August 2, 2016. **3/15/2016** Water system issued compliance order for ARA exceeding arsenic MCL. **8/2/2016** Water System is currently getting bids from three companies to determine which treatment type is most feasible.

**12/29/2016-**Data needs to be cleaned up in SDWIS to reflect current status. SOX may be deleted and violations may be reassociated with old compliance order. LPA will reassess on whether this system has RTC. **11/30/2015-**LPA was planning on revising compliance orders with a RTC date of 11/16/2016. No longer going to create public entity. Water System just changed ownership in July 2015. Water system is planning on public meeting on 4/20/2016 to look at connecting smaller water systems into a larger water system. Water system ARA has dropped below the MCL. **8/2/2016** Water system is currently not exceeding the MCL and will remain on quarterly sampling.

**1/19/17: water system is currently awaiting a connection estimate and dates from larger utility. 9/6/2016:** Water System is going to spend the rest of their grant money on connecting to another SWS. They are waiting on the county to provide them with a contract for the service connection. **6/9/2016:** Water system has not signed a contract with the larger utility. Water system is not going to do treatment as they cannot afford O&M costs. **11/30/2015-**LPA was planning on revising compliance orders with a RTC date of 11/16/2016. Water System finished pilot study. Water system is looking into consolidation with another SWS. Water system had a public meeting on **4/14/2016** in regards to connecting to a larger water system.

1/18/17: Water system submitted pilot study from Engineer. LPA is working with DDW staff for Technical Review and comments. 6/9/2016: Water system hired engineer to determine operation issues with the water system. 11/30/2015-LPA was planning on revising compliance orders with a RTC date of 11/16/2016. Operational issues. Water system changed ownership 3/24/2016. 8/2/2016 Water System is on a compliance order to determine what the operational issues are. Technical Report from PE due to EMD no later than 8/15/2016

1/19/17: water system is currently screening aquifers at new well to determine arsenic levels. 6/9/2016: New well was dug May 2016. Arsenic has not been tested for since well was dug. 12/23/2015-LPA states that the water system will be receiving a revised compliance order by the end of the year. 11/30/2015-LPA was planning on revising compliance orders with a RTC date of 11/16/2016. Well #3 is no longer on line 3/15/2016 Water system has submitted application to drill a new well and conduct a pilot study on new well to determine which treatment system will be installed. Well construction permit issued 2/18/16

1/19/17: water system is anticipated to connect to larger utility at the end of February 2017. 12/7/2016: Water system installed transmission line and anticipate to install lateral lines and connect individual unit by Jan 2017. 6/9/2016: Water system is in contract with larger utility to connect in October 2016. 11/30/2015-LPA was planning on revising compliance orders with a RTC date of 11/16/2016. Constructing line to consolidate or be a consecutive system with a larger system. Construction for new line to larger water system will begin in fall 2016.

1/19/17: Water system has placed new well online. Last 2 quarter samples are 13 ug/L. 6/9/2016: Water system is still currently connecting piping from new well to distribution system. April sample results for new well were 13 ug/L. 12/23/2015-LPA states that the water system will be receiving a revised compliance order by the end of the year. An inspection for was conducted in April 2015 and the well has not yet been finalized yet. The LPA has not heard on when the new well will be put online. 11/30/2015-LPA was planning on revising compliance orders with a RTC date of 11/16/2016. In contact with well driller to put wells online. New well has completed T22 testing and is installing piping to put new well online.

No current comment

What were the arsenic concentrations of the new well?

Has the system consolidated?

What's the new plan?  
Can the system get treatment installed in 18 months?

6/24/2016: The system has been in talks with neighboring water system to consolidate however no formal plans have been submitted. The LPA will send out an amended CO and give them 3 years to comply. 5/12/2016-the water system is working with Tetrtech to provide a RO treatment unit. The operators met with EHS in September 2015 to discuss brine disposal options and were referred to the RWQCB for guidance. 12/1/2015-The system applied for funding and is working with CRWA to gain compliance. 6/2015-Talked with RCAC regarding funding possibility. EHS will issue citation without a fine

6/24/2016: Formal plans for the proposed RO system have not been provided. The LPA will send out an amended CO and give them 3 years to comply. 5/9/2016-The water system is working with Tetrtech to provide a RO treatment unit. The operators met with EHS in September 2015 to discuss brine disposal options and were referred to the RWQCB for guidance. 12/1/2015-The water system is working with Tetrtech to provide a RO treatment unit. The operators met with EHS in September 2015 to discuss brine disposal options and were referred to the RWQCB for guidance. 6/2015-RTC depends on funding availability

6/24/2016: LPA approved the arsenic water treatment plans. System is in the process of being installed. 5/9/2016-EHS is reviewing plans submitted by the water system for an AdEdge arsenic treatment unit. EHS is reviewing plans submitted by the water system for an AdEdge arsenic treatment unit. 11/2/2015-Treatment unit plans were submitted to EHS for review.

6/24/2016: Had a meeting on 6/22 with water system to discuss compliance plan. The water system is to meet with Hi Desert regarding intertie as back up to primary well. 5/9/2016-Design complete for interconnection with High Desert Water District. Awaiting prop 84 construction funds. 5/5/2016: Issued NOV on 3/29/2016 and now are now in negotiations with the county. Fluoride and Uranium were also added as constituents that were above the CA MCLs and were included as information only since the Fed EPA cannot enforce them. 3/8/2016-DDW has requested that EPA issued a compliance order. 2/18/2016-DE followed-up with San Bernardino County Special Districts, who operates the water system, about providing bottled water, and they discussed about applying through FFAST for the interim CAA emergency funds. The CSD have not been directed by the LPA to provide bottled water, so the DE gets the feeling they are hesitant to do so. The DW will keep the discussion going. There is a resolution to this in the works. Last year they completed a P84 planning project to design a 5-mile pipeline to the nearest WS, and DFA is reviewing their construction application now. They are hoping to get the FA out soon and start construction this summer. The DE didn't think he had a project where DFA was keeping the district office out of the loop, but this is one. He learned from DFA on Tuesday this week, that they had a kickoff meeting with the system in November and have been in contact with them on changes to the plans and specs that we approved last year. DFA did say they will keep the DE updated on the next documents to be submitted. 12/1/2015-Design complete for interconnection with High Desert Water District. Awaiting prop 84 construction funds.. 6/2015-RTC depends on funding availability

Has a revised (2016)  
compliance order been  
issued? The dates and  
the discussion do not  
align. X

<p>2/5/2016-Ironwood Campground was cleared by technical, environmental and financial staff in the end of 2014. In April 2015 DFA legal counsel determined that the language in the applicant's bylaws prevented the State from doing business with the entity. This was because they discriminate on who can be a member of the community (campground) and our legal counsel determined that we would be violating state law to funded the project. As a result, the application was inactivated. Submitted Application on 3/26/14 for planning funding</p>	

**12/29/2016:** Knoll's intent to comply letter was received in January 2015 in response to amended CO dated 11/14/14. Knoll didn't send any update since January 2015. A citation was issued on 7/10/15. District Engineer will be assisting LPA with escalated EA. **10/31/2016-** Spoke with owner as always she was very eager to comply and take adequate steps needed to move situation along but there is no follow through on her part and remains unresponsive when trying to find out what the status is. **9/16/16** - A viable plan has not been submitted at this time, we are working with the PWS. **6/24/2016:** Water system unable to apply for funding and has not provided a viable compliance plan. A citation will be issued and an amended compliance order issued to comply in 3 years. **5/9/2016-**Water system submitted a compliance plan however it lacked details on how compliance would be achieved. EHS is following up.**12/1/2015-** Water system submitted a compliance plan however it lacked details on how compliance would be achieved. EHS is following up. 6/2015-EHS will issue citation without a fine

**12/29/2016:** RAA for RO Effluent = 1.975 µg/L, the System is planning on expanding their RO treatment system for the entire facility. Currently, the treated water is for the coffee shop and dining hall. **9/16/16** - They have determined that because of their bylaws they would not be accepted for funding so have not reapplied. Their comment: "We are working on a plan to expand our RO coverage but it will take time to fund and implement. Currently everyone we provide water for obtains their drinking water from our RO system. We have had a large RO unit donated to our organization which triples our production ability. Again it will take time to secure funds necessary for the install and to do the install." **6/24/2016:** Water system applied for funding but cannot be approved. The LPA will issue an amended compliance order requiring compliance in 3 years. **5/9/2016-**Water systems currently has an RO system that serves the dining hall, both coffee shops, etc. however staff residence are not served. The system has applied for funding. **12/1/2015-**Water systems currently has an RO system that serves the dining hall, both coffee shops, etc. however staff residence are not served. The system has applied for funding. **6/2015-**Sent water system an amended CO

No current comment

EPA presumes that a permit amendment or modification is necessary. Would it be possible to expedite completing the installation? Since all water consumption happens at RO station already.

01/25/2017 - Per Mark Magtoto of DFA (on 1/18/17) , the POU agreement is being reviewed by Daman Badyal and will be sent by the DFA analyst to Andrea Sissons of Warner School when ready. Per Andrea Sissons of Warner School (on 1/18/17) the signed funding agreement and attorney letter for the long term solution were to be forwarded to Brenda Pauli of DFA. 11/4/16 - Agreement No. D16-02007 was issued on 9/28/16 to Warner School from DFA for the permanent solution and included the transmittal Letter, Funding Agreement/Exhibits, signature pages and Draft copy of the General Counsel Legal Opinion Letter. The School Board approved the package and currently the legal general opinion form is being completed by School attorneys. The Clean-up & Abatement Fund agreement is being reviewed by DFA analyst. 6/15/2016 - Application for Clean-up and Abatement funds for interim solution was submitted in May 2016. Mark Magtoto of DFA indicated the application would not be considered since the engineering design from NV5 included a POE for the cafeteria building and not a POU as used in other schools with an Arsenic exceedance. A conference call between NV5, CRWA technical assistance provider, Mark Magtoto of DFA, LPA, Certified water operator, Warner School representative and DE happened in 6/2016 and addressed how to move forward. Engineer NV5 was to investigate the POU used at another school in the State and report back to the group. All documents have been submitted to Brenda Pauli of DFA to complete the application for funding for the long term solution. Application is under review and will take several months per Brenda Pali. 11/20/2015-The LPA had a conference call with Warner School today. Kyle, Brenda, Sean, Connie, Noel and the school were present. There are two items missing from the application to make it complete:

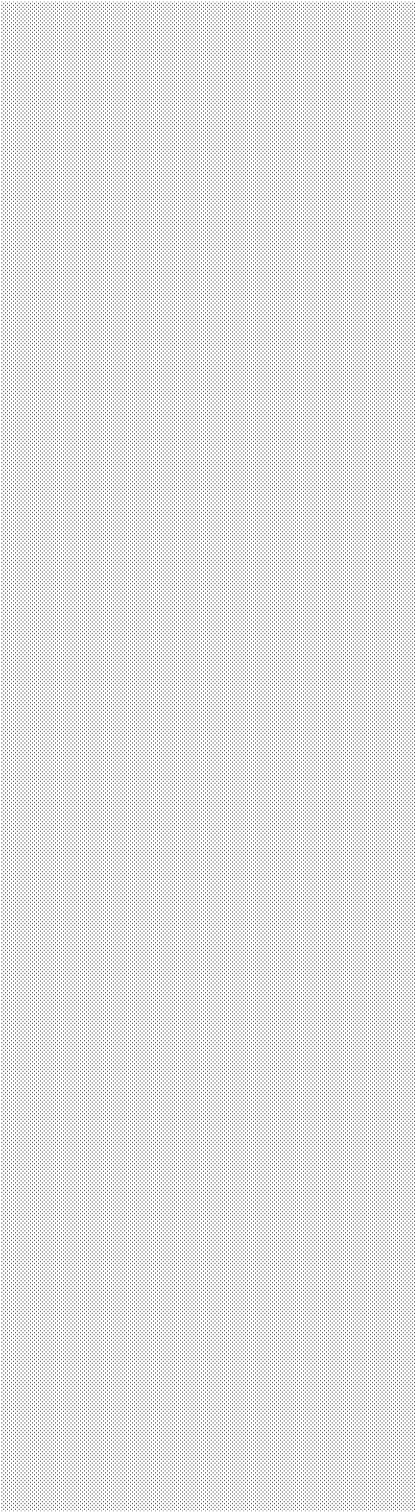

- Authorizing Resolution
- Schedule of System Obligations

The school board meets next on December 8th, at which time these items can be addressed. In the meantime the school will complete a Prop 84 application to request funds for bottled drinking water for staff/kids. The LPA is planning on visiting the site while the students are on winter break. At that time, or shortly after their visit, they will issue a revised Compliance Order that meets the approved State requirements. They will work with the DE or DDW staff to ensure that it meets all of the criteria needed to be a formal EA.

6/2015-The water system has two separate distribution systems. Well 3 is located east of Highway 79 and serves a high school, elementary school, bus maintenance building, office and residence. Well 4 and 5 are located west of Highway 79 and serve a resource center, concession stand, ball fields and continuing education classrooms.

1/25/17 - Arsenic reduction plan is due to the LPA by 3/1/17 and will likely identify blending as the long term solution. LB Twin Lakes Resort has a total of 3 approved wells, 2 of which have been in stand-by mode for the past 4 years. Water quality results from Well 1 is currently being analyzed to determine if blending is an option. Well 7 is the source which exceeds the Arsenic standard.

6/13/16, This is State funded project and San Joaquin County Public Work Department is working on the plan for the new water line extension. Once the County approves the water line extension, the City of Stockton will start the connection process. 1/11/16 CRWA is continuing to work with city and water system towards making a connection using SWRCB Funds. 11/19/2015-As this is a state funding project. The LPA has no idea on the RTC date. LPAs do not write new compliance orders with new RTC dates this is a funded state project. 11/2/2015- Julie Martinez of Cal Rural Water is working with City of Stockton for funding agreement to make a connection to MHP. Engineered Plans approved by County and City in March 2015. City to file for funding agreement w/ state in 60 days.

6/13/2016, This is a State funded project and CRWA is working with the water system and San Joaquin County LPA is unaware of the status. 2/22/2016: Reid Johnson of Nolte Vertical 5 is the consultant working on this project. This is a SB funding project that provides money to the City of Manteca to install a new Source and to make a connection to this school through an Emergency out of Service area LaFCO connection. 1/11/16. Consultant, Reid Johnston, is continuing to working with water system and city to make this connection using SWRCB Funds. 11/19/2015-As this is a state funding project. The LPA has no idea on the RTC date. and the LPA doesn't write new compliance orders with new RTC dates when they are being funded. 11/2/2015- LaFCO approved out of service area connection. City working with CRWA for making a connection to the school . 3/31/15 -Sent emails to School, Engineer, City PW and State for update on progress to connect to city. No one at City or State knows where this funding project is at. 3/21/14-applying for LaFCO out of service area connection.

6/13/2016, This is a State funded project.  
Yes, bulk hauled water is provided by Aero Pure Water Company.  
The test well was drilled and destroyed on 10/28/2015. 1/11/16 Julie Martinez of CRWA is continuing to work with the water system to obtain the proper paperwork for SWRCB funding to make a connection with the City of Stockton.  
6/1/2015-System lacks money. Public Notification.11/2/2015-Julie Martinez of Cal Rural Water contacted Silvia regarding needed documentation. Silvia has not yet been able to locate anything but the deed, but she has not yet sent it to me. Silvia gave permission to contact her lab and Quality Service. Inc. for additional information. A scheduled site visit for Nov. 3rd will be made. Pursuing the connection to City of Stockton .

6/13/2016, Contractor has submitted the second round of corrections to San Joaquin County Public Work Department pending for approval to install a 12" Water main extnsion. If not finished by the end of this year, A new order will be issued with a new RTC date. 1/11/2016- On 9/15/15 the LPA was made aware that the new source collapsed and was no longer a viable option. The water system was directed to obtain a Will Serve letter from Cal Water Services for a connection. On 9/29/15 the LPA received a copy of the "Will Serve" letter that confirms Cal Water Services will service this parcel. The Water System is working with Cal Water Services and Cal Trans for permits and approval to cut through the road to make a connection with the Water System. This connection should be accomplished by March 2016.  
11/2/2015-New source Well collapsed. They received a Will Serve letter from Cal Water and will be making a connection within the next 12 months by 10/2016. 3/1/2015--Cal Trans completed Hwy 99 construction and took property away from this system. Now in process of installing new separate drinking water distribution system from a new source that meets arsenic standards. 2/1/15 received plans to separate industrial water use from potable use and MDD study. Plan approved for use of a new source and distribution installation. System to be in compliance by 6/1/2015.

**10/31/16** - System Drafting Proposal which includes a lease and maintenance contract for POU units, pilot study to be included as part of proposal **5/4/2016**-DE received a call from a water system representative saying they are ready to move forward with funding and treatment.1/29/16 - Neighboring development reaching out to from larger service area, would add an Arsenic well but pooling more connections may be beneficial **12/1/2015**-Country Hills really can't consolidate with any local system - they are still looking at the POU option. There is a large adjacent parcel which is trying to split into 22 lots. This parcel has one well (with Arsenic) but they might be willing to throw money at Country Hills and then perhaps they can all have a treatment plant installed. Very political. **6/2015**-Out to bid for POU.

Recommend revised  
CO to keep PWS on the  
path to complete the  
water line extension.  
Please update interrim  
measures since the  
school is providing  
bottled water.

Recommend revised  
CO to keep PWS on the  
path to complete the  
water line extension.

Recommend revised  
CO to keep PWS on the  
path to complete the  
water line extension.

12/6/2016- The well 2 arsenic treatment project is being funded w/ Calpine's own resources. Calpine has other funding applications submitted under review, including one which adds a new well and another to install meters. (PETE)	No

10/12/2012	6/30/2014	10/15/2016	10/11/2016

WAITING FOR SHPO CONCURRENCE LETTER	N/A	N/A

**10/31/16** - Construction Funding Application in **5/4/2016**-The school just wrapped up their pilot study and we are meeting with them Monday to discuss the project moving forward. 1/29/16 - pilot plant continues to operate, data thus far shows that arsenic is reduced from approximately 12-13 ppb down to ND. **12/1/2015**-the plant was brought on-line about a week ago. The LPA has not seen data yet. They are also exploring a new well and are looking at sites. Still in funding world as far as the LPA knows. **6/2015**-In pilot test with treatment system.

**11/4/2016** - Sierra County WWD #1 - Calpine completed construction of the wellhead arsenic treatment system at Well 02 on 10/15/2016. Purging and testing was run to waste and the effluent samples tested ND for bacti and arsenic. DDW sent a letter of approval for operation prior to the permit amendment completion on 11/4/2016. The water supplier returned to compliance on 10/25/2016. Entered in SDWIS 11/2/2016. **8/1/2016** Sierra County WWD #1 - Calpine submitted their quarterly report in accordance with the Compliance Order. It describes the work to date on the wellhead treatment system they will be installing in September 2016. They indicate the self-funded construction project is still on schedule for wellhead treatment completion and compliance with the arsenic MCL by November 2016. Filter vessels and media are in process of being installed. **6/27/2016**: the District has informed us in writing that the well head treatment project is on schedule Completion of construction is expected in the next 60 days. Once construction is completed the design engineer and system's chief treatment operator will work together to commence start-up testing. 9/22/15 - Proposing a quick time line project to put in well head treatment. Piloted adsorptive media. Will be able to meet November 1, 2016 deadline to be in compliance. However, they didn't apply for SRF. Skid mounted treatment system. Set up for CRWA circuit rider to help with putting an application together but they have decided to fund project with their own money. **7/1/2015** - DDW issued a second compliance order to the District on March 4, 2015 which included a Nov 2016 compliance deadline. The Order directed the District to present a Corrective Action Plan by April 1, 2015 which they did not meet. As a result, DDW issued a citation with \$500 penalty to the District on May 8, 2015. The District submitted a Corrective Action Plan on June 10, 2005 which is to provide wellhead arsenic treatment (absorptive media) at their one high arsenic well. Preliminary construction drawings were submitted on June 29, 2015 and are being reviewed by DDW. In order to complete the project as soon as possible (by the end of 2015), the District is planning to use their own reserves to fund the project however, per DDW's request the District will also submit a SRF application in order to keep their funding options open.

**1/13/2017**: An acceptable corrective action plan received October 10, 2016. Next plan milestones: 2/1/2017 to select treatment vendor and media, 5/1/2017 to complete treatment design, installation completed by 1/1/2018. Proposed schedule is consistent with the March 2015 order requiring RTC by 4/1/2018. **9/2/2016**: Letter stating we did not receive a corrective action plan was sent 7/19/2016. Next action will be: either we receive a viable plan or take further enforcement action 10/10/2016. POU not feasible. Ion exchange treatment is the most likely outcome. Enforcement action set 4/10/2018 RTC deadline. System is a resort RV park and mobile home park combination. They may also choose to limit occupancy to achieve TNC classification. **9/22/2015** - System has decided to use POUs for compliance. Detailed proposal is due at the end of this month. April 10, 2018 is deadline for compliance.

**6/26/2015** The system was to submit a response by to the Order by May 22, 2015 indicating their cooperation in complying with the arsenic MCL (they did this). They are investigating cost/benefit options of four types of well head ion exchange units as well as the cost of under the sink POU treatment devices at the ten or so permanent residences and the cost of routine monitoring to determine compliance.

**01/10/2016** - Quarterly progress report received. Arsenic levels trending back down to historical levels of 6 to 7 ppb in past 3 quarterly samples. Possible that system samples back into compliance in Q1-2017. If system still out of compliance, Treatment Eval. due **04/30/2017**, in accordance with CAP. 11/14/2016 - Submitted arsenic evaluation cites source of elevated arsenic levels as well discharge pipe scaling and reservoir sediments. Distribution samples consistently below 10ppb. 10/18/2016 - Quarterly progress report received. 07/28/2016 - Compliance Plan received. System proposed to continue sampling the well as levels appeared to go questionably high above historical. System currently uses RO units for POU consumption. District will have to verify if the RO units are certified for treatment and can be permitted.

**1/17/17**: POU permit in process, working with system to finalize application. A site visit will be scheduled this quarter.

**10/26/2016**: POU permit application has been reviewed, waiting for system to submit additional and updated documents to complete the application.

**7/25/16**: Water system has submitted permit application to add POU treatment. Application is in process of being reviewed.

**6/16/2016**: Water system is not on track with CO. New projected RTC date is July 1, 2017. **4/20/16**- The system continues to work on the permit checklist items and follow the directives of the CO. **1/11/2016** - Sent a permit checklist for POU and reactivate Well 01 on 11/2/15. System requested extension to 6/1/16 to submit the items on the permit checklist. The system has been submitting quarterly progress reports and PN as directed in the CO.

**9/22/15** - System in process of evaluating alternatives (POU).

**6/30/15** - Compliance Order issued on 6/3/2015. System is starting the process to evaluate a solution. Issue either a permit or CO. Review proposed POU/POE regs

**1/17/17**: POU permit in process, working with system to finalize application. A site visit will be scheduled this quarter.

**10/26/2016**: POU permit application has been reviewed, waiting for system to submit additional and updated documents to complete the application.

**7/25/16**: Water system has submitted permit application to add POU treatment. Application is in process of being reviewed.

**6/16/2016**: Water system is not on track with CO. New projected RTC date is July 1, 2017. **4/20/16**- The system continues to work on the permit checklist items and follow the directives of the CO. **1/11/2016** - Sent a permit checklist for POU treatment on 10/30/15. System requested an extension to 4/1/16 to submit the items on permit checklist. The system has been submitting quarterly progress reports and PN as directed in the CO.

**9/22/15** - System is evaluating how to implement a POU project.

**6/30/2015** - Compliance order issued 5/29/2015.

**1/13/17** - Kickoff call being schedule for recently approved assistance request. **11/24/2015**-Can system move forward with consolidation so when Hughson returns to compliance, all systems RTC at the same time? The LPA and SWS are not involve in this process and therefore cannot comment on moving forward with the consolidation. **11/2/2015**-\*Formal compliance plan has not been submitted to this department, but this water system is a candidate a large water system consolidation project (Hughson City). Compliance order will be revised based on definitive guidance this project will happen. Awaiting response.

12/6/2016- Construction funding agreement has been drafted and is routing for final management approval. (PETE)

6-10-16: MPP will consolidate with Keyes. The construction FA is getting very close. We requested FY 14/15 audited financial statements, which Keyes will submit by the end of the month (6/16) at the latest. Everything else from an SRF standpoint appears ready to go. However, we may be able to get them additional grant funds through a new groundwater Prop 1 funding program. That program doesn't have their process/structure in place yet. If we funded the project solely with SRF money, I'd project an August 16' FA issuance. If we co-fund, it will take longer

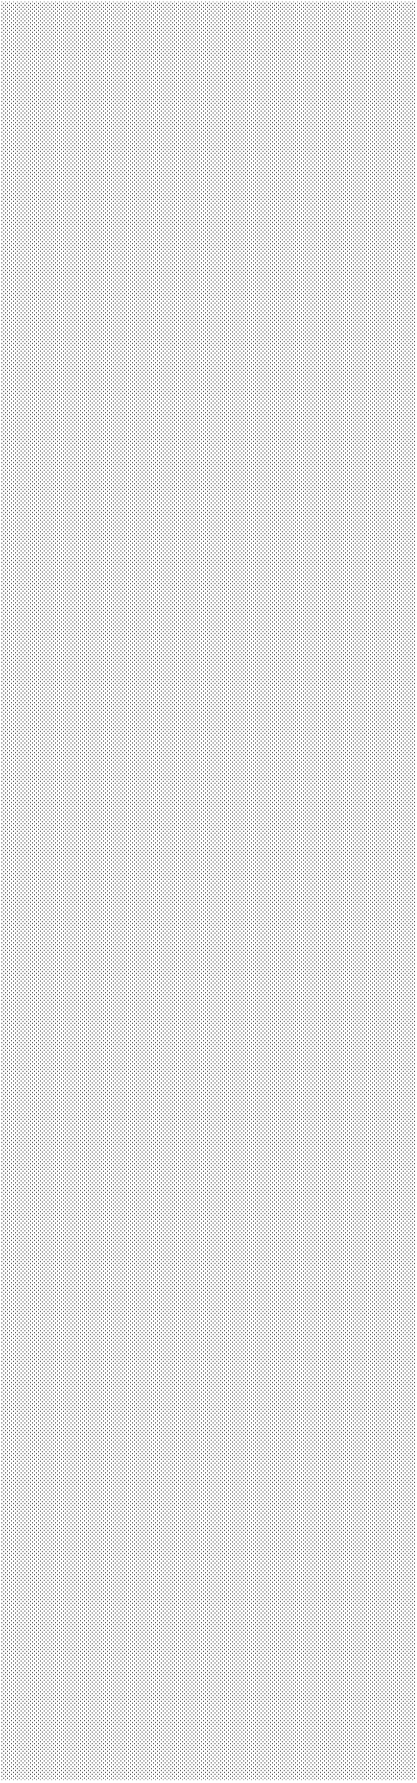

12/6/2016- Construction funding agreement has been drafted and is routing for final management approval. (PETE)

**1/13/17 - No Change. 11/24/2015-**Can system move forward with consolidation so when Keyes returns to compliance, all systems RTC at the same time? The LPA and SWS are not involve in this process and therefore cannot comment on moving forward with the consolidation. **11/2/2015-\*** Formal compliance plan has not been submitted to this department, but this water system is a candidate a large water system consolidation project (Keyes Water System). Compliance order will be revised based on definitive guidance this project will happen. Awaiting response.

**1/13/17 -** After rejecting the request for consolidation, the city of Ceres offered to review the water system's engineering report for the request to consolidate. The city commented that the water system had not considered POU treatment as an option. The water system has been advised of applicable code and directed to provide a proposal to the LPA for review. **6/16/16 -** On June 13, 2016 the water system went before the City of Ceres Council to request consolidation. The City of Ceres rejected this request for consolidation. A new Corrective Action Plan will be required of the water system. **4/22/16 -** Office Hearing was conducted on April 19, 2016. A new compliance order is being generated and water system has been directed to provide documentation to support their claim that LAFCO has rejected their consolidation request. **2/26/2016:** Revised compliance order will be drafted following an Office Hearing that is scheduled for April 5, 2016. **2015:** Formal compliance plan has not been submitted to this department. Compliance order will be revised based on definitive guidance. Awaiting response.

**1/13/17 - Kickoff call being schedule for recently approved assistance request. 11/24/2015-**Can system move forward with consolidation so when Hughson returns to compliance, all systems RTC at the same time? The LPA and SWS are not involve in this process and therefore cannot comment on moving forward with the consolidation. **11/2/2015-\***Formal compliance plan has not been submitted to this department, but this water system is a candidate a large water system consolidation project (Hughson City). Compliance order will be revised based on definitive guidance this project will happen. Awaiting response.

**1/13/17 - Encroachment permits delayed the anticipated consolidation completion date of December 31, 2016. An updated timeline for completion has been requested. 6/16/16 -** Water system obtained legal council to move negotiations forward and anticipates closure of negotiations by the end of June. Begining in July the water system will initiate obtaining construction permits for the service connection. **4/22/16 -** The water system projects having consolidation fees negotiated with City of Ceres within the 2nd Qtr of 2016. **2/26/2016:** This water system is scheduled for an Office Hearing on March 1, 2016 due to failure to move forward with consolidation and will receive a revised compliance order. **11/2/2015-\***Consolidation plans submitted on 8/24/15. Existing well will be converted into a landscape well and domestic supplies will be provided from the city of Ceres.

**1/13/16 - A testhole for a new source was drilled in 4th Qtr 2016. Initial water quality testing indicates that there are no viable aquafiers. The system is now consulting with their distribution operator and engineer for the next plan. 6/16/16 -** The source is now showing elavated levels of nitrates and the water system has been required to initiate quarterly sampling. The Water system submitted correspondance on 6/8/16 indicating that they would be submitting documentation to obtain a well construction permit by the end of June 2016. A new corrective action plan is to follow per this correspondance. **4/22/16 -** No new progress. **11/2/2015-\***Requested guidance from Waterboards on RTC for water systems with RAA below, but near MCL.

**1/13/17 - Water system has completed financial of their privately funded consolidation efforts. Permits will be applied for at the beginning of 2017 and the expected completion date is April 2017. 4/22/16 -** The water system owner experienced a medical emergency and was unable to attend. The office hearing was rescheduled for May 17, 2016 as his Dr will release him for attendance at this time. **2/26/2016:** The water system has not moved forward with consolidation. An Office Hearing will be conducted on April 12, 2016, with a revised compliance order to follow. 9/10/15 this water system received LAFCO Approval Letter for Out of Boundary Service Agreement. Consolidation time frame will be forthcoming.

**1/13/17 - Water system plans to privately fund a tie-in to the Keyes WS consolidation for (Faith Home/Green Run/Countryside/Mobile Plaza). 4/22/16 -** This water system RAA is trending upward. Initial testing for 2Q - 2016 indicates the RAA will exceed the MCL in 2Q - 2016. A compliance order will follow once the official RAA is established.

**1/13/17 - No Change.** **4/22/16** - Water system has secured a civil engineer with water experience and is developing an application for installation of a treatment plant. **1/19/16** - Office Hearing conducted on **1/19/16** for this water system. A new compliance order is being issued to the water system. **11/24/2015**-On November 10, 2015 this water system failed to provide the required course of action. Further legal action will be taken against the water **system.11/2/2015**- Installation of new source not likely to result in RTC, currently city of Turlock consolidation not feasible at this time.

**12/8/16**- FA will be issued by 1/1/17, Consolidation project no longer included but agreement will be issued separately.

**4/18/2016**-No status change from previous update. DFA Project Officer - Joel Greathouse

**9/22/15** - Two projects, well and treatment and other consolidation. Technical and Financial clearance are ready to issue but don't have ERU clearance. The City needs to do more environmental work. Two projects under one funding agreement.

**7/1/2015** - Project is having a consolidation component added. Two LPA regulated systems in Stanislaus County that have Arsenic MCL violations are going to be consolidated into the City of Hughson. The City has been very responsive to this addition. DFA is working on funding agreement for consolidation to combine with funding agreement for Hughson to construct two new wells and an Arsenic treatment plant.

Please provide an  
update on the  
treatment plant  
application.

Please reconcile RTC  
date and construction  
completion. Amend  
CO as necessary.

10/26/2011	12/28/2012	1/27/2016	

	Funding agreement for regional project was executed, kickoff meeting was held 1/18/17.	

**4/18/2016**-No status change from previous update. 11/5/2015-per DFA Project Manager - Marques the construction FA may get issued early 2016.

**9/22/15** - ERU is finishing up review. Need to finalize the scope of the project for the consolidation part of the project. Projected funding agreement will be issued in approximately 2 months. Construction scheduled to take 2 years. Still need to finalize the design of the consolidation elements. Meeting with the three systems on 9/28/2015 to get update on status and work on the water service agreements for the consolidations.

**7/1/2015** - Project is having a consolidation component added. Four LPA regulated systems in Stanislaus County that have Arsenic MCL violations are going to be consolidated into the Keyes CSD. The District has been very responsive to this addition. DFA is working to fund this overall project as a regional consolidation to enable sufficient grant funding to be made available to pay for this project.

**1/17/2017** - Water system is still working towards meeting compliance order directives by 2018. They are looking to extend directive deadlines pertaining to funding application submittal and funding acquisition. State will most likely approve extension request because the system is taking action toward compliance. **11/7/2016** - Water system was issued a compliance order in September 2016, ordering the system to meet arsenic and manganese drinking water standards by 12/31/2018. DDW set up bi-weekly meetings with the county to discuss progress as well as obstacles that would prevent the system from meeting all requirements. **8/16/2016** - A review of the FFAST website shows that a construction grant application for arsenic treatment has not been submitted yet. CRWA will be assisting the WS with the application. It is still unknown as to whether Golden State Water Services will purchase the water system. **4/20/2016** - Project will potentially be slowed up a little bit as Golden State Water Services is looking to purchase the Robbins water system. Two funding applications are in the works right now to first install meters, then to construct the arsenic treatment plan (along with 100% design plans and specs). **1/22/2016**- planning study is complete, but final design will be completed under a construction grant. **9/22/2015** - Preparing an application for water meters as well as project. Met with County in July on meter project. Construction application will be submitted once planning project is closed out. Will be a C/F treatment plant

Please provide current  
update for project  
status.

**1/17/2017** - Full FA application was submitted in December 2016 - under DFA review. **11/7/2016** - FFAST application documents are still in the process of being completed. **8/16/2016**: The Valley District recently approved the production well design for the water system. The engineer for the project is currently working on the FFAST application for construction funding. **6/9/2016** - A test well was recently successful in locating good water bearing strata. As soon as this SRF planning study is complete, a revised compliance order will be issued with a compliance deadline - which will be 3 years from date of issuance, maybe sooner if agreed to by upper management since this is just a well. 3 years is typical. Estimated time to formally complete the planning study is estimated to be 4Q16. **4/20/2016** - Water bearing zone has been selected from test well results, but selected zone will be redrilled (as of 4/21/2016) and samples retaken due to inconclusive secondary constituent results. **1/21/2016** - Drilling contractor has been selected. Test well drilling and sampling is to take place within the last two weeks of January.

**1/17/2017** - Construction Application is still under review by the DFA. **8/16/2016** - For this quarter CRWA just recieved completed CEQA documentation from the City fo Yuba City in an effort to help complete the FFAST application for contstruction funding. The water system is still on bottled water. **4/8/2016** - As the surviving entity, the City of Yuba City has requested assistance from California Rural Water Association to complete a funding application to fund construction for consolidation with Barry Elementary School. CRWA working on CEQA requirement. **1/8/2016** - As the surviving entity, the City of Yuba City has requested assistance from California Rural Water Association to complete a funding application to fund construction for consolidation with Barry Elementary School. The City of Yuba City is seeking to complete required CEQA documentation as this is needed in order to complete the construction application for funding. CEQA documentation is anticipated to be complete by spring of 2016.

12/7/2016: Consolidating with Los Molinos CSD. Please see LMCSD's Project Status. 12/14/2015-Stuck in CEQA process. Had hoped to be drilling new well January 2016.

12/7/2016: Consolidating with Los Molinos CSD. Please see LMCSD's Project Status. 12/14/2015-Stuck in CEQA process. Had hoped to be drilling new well January 2016.

**1/17/2017** - Waiting on DFA to review letter from Fish & Wildlife; still approximately 2 months away from executing a FA. **11/7/2016** - DFA received service agreements and financial package from WS. Technical and financial has been signed off. The Environmental Review Unit (ERU) is sending a letter to US Fish & Wildlife (USFWS) requesting comments by 12/7/2016. Once positive confirmation is received from USFWS the DFA will draft the funding agreement. **8/16/2016** - Planning Project has been completed and FFAST application submittal for a new well construction grant is pending review and approval of Draft Water Service Agreements (By Gary Chan, LMCSD, and CSD attorney) and Financial Package (by Jim Lowden with LMCSD). **4/20/2016** - A required CEQA study (Initial Study/Mitigated Negative Declaration) has been completed by Coleman Engineering and Enercon Services, Inc. for this project. Coleman engineering has submitted a FFAST application for the construction phases (Phase 1 &2) of this project. P&S for both phases have been approved by the District Office. **1/21/2016** - Plans and specifications have been approved for the new well. Due to the State ERU taking exception to the recorded NOE for the new well, the construction application process cannot proceed until recently submitted CEQA documentation is approved by the ERU.

**1/13/17**- Water system is still moving forward with POU/POE. Install should begin 2Q 2017. **10/26/16** - Water system is moving forward selecting POU/POE. **8/1/16**: Water system has proposed POU/POE. System has hired a consultant to identify and select units/locations and to develop the POU/POE plan including operation. **4/27/16**: Working with water system on timeline to begin construction. Water system bringing in consultant/operator. **1/11/16**: CO issued Q1 2015. CAP identified POU as the preferred alternative. System is exploring POU vs. POE and costs. **9/21/2015**: CAP identifies POU/POE as the preferred alternative. CO issued Q1 2015.

**1/17-FA has been executed - construction not yet out to bid for second well.** 6/16. 1 well drilled with USDA funds. Construction planned for another new well, modifying existing 2 wells to seal off the lower aquifer with high arsenic, storage. 10/15-P84 Construction FA issued 9/15. System should be moving to the bidding soon.

1/17-Prop. 218 passed for the O&M costs for the arsenic treatment plant. Construction funding application should be submitted by SelfHelp in 1st Qtr 2017. 12/12/2016- Construction application is being processed. Recently passed Prop 218. 6/16 - Planning finished, Plans and specs approved. Finishing environmental and construction application. Finalizing rate study. Prop 218 hearing by end of summer 2016. 10/15-Plans and specs submitted and reviewed. Final plans and specs due 12/15. System will be moving to FFAST app for Construction

2/28/17: Connection of Well 02 to distribution system postponed due to weather. Water system may request extension to CAP connection deadline of 4/30/2017. Water system is undergoing permit amendment process. Water quality results to be submitted for Well 02. 11/4/16: Corrective Action Plan submitted 9/2/16 in response to Compliance Order CC0001190. Well 02 was installed 9/16/16 pending final inspection; blending proposal to be submitted to YCEH by 11/30/16. 8/8/2016: A new compliance order was issued in July 2016. Water system will submit a new Corrective Action Plan by 8/31/2016. 6/28/2016: LPA will be issuing the water system a new compliance order by 7/1/2016. Water system was RTC due to a misunderstanding that bottled water was an acceptable long term solution. Sanitary survey was conducted , a new compliance order will be issued by the end of May 2016 .

Water)

2/28/17: No status change from previous update. 2/1/2017: The arsenic levels in Well 02 and post treatment are being monitored monthly to determine both Raw and Treated water RAAs for compliance with the Arsenic MCL. Arsenic levels in both the raw (Well 02) and treated water have fluctuated above and below the MCL since initial testing began in August 2016. Since Well 02's installation and connection to the water system, the treatment process has been unreliably effective, with intermittent treatment failure. Because of this, the water system is currently under monthly public notification, which is updated to reflect the current levels of arsenic from monthly testing results and the status of the treatment system operation as reported by the Operator. The Operator is working with Culligan to determine why the treatment system may be failing intermittently. YCEH is waiting for a final assessment of the treatment system from the Operator and Culligan pending their findings. The system is currently operating on by-pass mode from the treatment system. The raw water results (Well 02) for the month of December showed arsenic levels at 9.1 mg/L. 12/22/2016: The Yolo Fliers Club treatment system has not yet been RTC. Since the installation of treatment earlier this year, Well 01 failed and Well 02 was installed. The arsenic levels in Well 02 and post treatment are being monitored monthly to determine both Raw and Treated water RAAs for compliance with the Arsenic MCL. Arsenic levels in both the raw (Well 02) and treated water have fluctuated above and below the MCL since initial testing began in August 2016. Since Well 02's installation and connection to the water system, the treatment process has been unreliably effective, with intermittent treatment failure. Because of this, the water system is currently under monthly public notification, which is updated to reflect the current levels of arsenic from monthly testing results and the status of the treatment system operation as reported by the Operator. The Operator is working with Culligan to determine why the treatment system may be failing intermittently. YCEH is waiting for a final assessment of the treatment system from the Operator and Culligan pending their findings. The system is currently operating on by-pass mode from the treatment system. The raw water results (Well 02) for the month of December showed arsenic levels at .0091 mg/L. 8/8/16: Source for water system has failed to supply adequate domestic water supply. A new well was drilled in July 2016. Initial water testing will determine if Arsenic removal treatment is still necessary. The department will hold a meeting with the operator and owner of water system to discuss domestic supply, new source testing and old well abandonment (August 2016). 3/10/2016: Installed Culligan ion exchange centralized treatment. Effluent results were taken at the end of January 2016, LPA awaiting notification of the results. LPA will RTC when RAA is below and treatment is established to be working.

2/28/2017: Permit Amendment issued 2/16/17. RTC pending based on RAA of treated water. 2/1/2017: Treatment was installed in September 2016. Water system is blending raw water with treated water to meet water demand for facility. Water analyses post treatment for 3Q2016 and 4Q2016 show levels < 50% MCL. Final blended water levels of Arsenic are not below the MCL. The water system is currently under public notification and has three POU devices which are installed on a temporary basis for MCL compliance. Sampling post POU's show levels of arsenic < 50% MCL. 5/5/2016: EPA had a conversation with the LPA to discuss a possible issuance of a NOV, but as time went on the water system submitted water quality data for the past year and has proposed to install treatment by 6/30/2016. EPA will follow-up with the LPA for a status update. 8/8/2016: Water system requested a 60 day extension for implementation of the treatment plan for contracting and funding reasons. New deadline for treatment implementation is 8/31/2016. 4/18/2016-A letter of commitment was received in April, 2016 with implementation of the treatment plan by 7/1/2016. 2/2016- Engineering report received with proposal to use activated alumina absorptive media. 12/7/2015- The system has not RTC, but is expected to provide a treatment proposal that will include coagulation and filtration. 11/2015-Temporary proposal approved for reverse osmosis POU treatment. 3/10/2015: System is not moving forward with directives that are in the last compliance order. We are asking EPA to go forward in doing enforcement.

Consider a new or revised CO to keep the system at the table with the treatment vendor to figure it out.

No

PLANNING STUDY-APPLICATION DATE SUBMITTED or PROPOSED SOLUTION (PRIOR TO 10/2016)
Quarterly monitoring of Arsenic
SRF funds have been approved for incorporation with the City of Gridley's water system.
Consolidation with City of Colusa
Modifying non-complying well
Inactivate Well #3. Wells #1 and #2 are below the Arsenic MCL.
POU installation using P84 Part 1 grant funding
11/4/2011
Treatment installed
Treatment
Arsenic removal treatment installed
Construction of replacement well.
Purchased 2 wells that comply with As MCL.
Going from groundwater well to a surface water system
Tank slowly refilled with treated water and all sampling since the event have been below MCL. It will take several quarters for RAA to drop below MCL.

No	SRF construction project for consolidation with Lost Hills Utilities District in progress

Privately owned mobile home park.
State community college. Have given them the pre-application information and strongly recommended they apply for funding.
Privately owned NTNC.
One well with arsenic and nitrate violation
SRF planning loan application was determined to be incomplete over two years ago.
P84 construction funding application received for consolidation with Erskine Creek Water Company. 2/13/15 (JSD): Issue of eligibility of storage tank; storage tank designed is of 200,000 gallons but eligible capacity is 94,400 gallons. DAF issued a letter to ECWC about this; response recd 2/13/15 from ECWC is currently under review by DFA.
10/05/15 (JSD): Supplier's Certificate of Project Completion dated 9/29/15 has been received. 100% inspection of the project by DDW and DFA staff was conducted on 09/29/15. Project completion certificate of DDW is under preparation. 5/29/15 (JSD): Construction project is over 90% complete with estimated completion date of June 30, 2015. 2/13/15 (JSD): P84 construction funding project in progress; 75% completed.
Using its own funds, Pinon Valley Water Company has installed arsenic removal treatment. Permit for the treatment was issued in January 2015.
Under RAA
Well 01 is in violation of the arsenic MCL, RAA 0.028 mg/L
Well 01 is in violation of the arsenic MCL, 3rd qtr. 2014 RAA 0.020 mg/L

Drilled new well, but it exceeds Uranium MCL. Installed AdEdge arsenic treatment plant w/o plan approval. New treatment plant is installed, approved, and operational since April 2014.
Continue quarterly sampling to monitor arsenic levels and report in CCR.
Treatment installed and monitoring is in progress. May take several quarters for system to RTC because of RAA.
Consolidated with Arvin CSD in 06/2010 using ARRA funds
Water Company wants to install dual plumbed system-one for outside irrigation and one for domestic use with arsenic treatment
Consolidation with Erskine Creek Water Company
Drill a new well and arsenic removal treatment using adsorption
Arsenic removal treatment installed using hybrid ion exchange technology.
Proposal to provide POE arsenic removal treatment
Consolidation with Lost Hills Utility District

Well 02 is in violation of the arsenic MCL, RAA 0.013 mg/L
Well 01 is in violation of the arsenic MCL, RAA 0.027mg/L. Well 02 on quarterly monitoring & has not yet failed the MCL (avg. samples = 0.014 mg/L.)
Has SRF funding commitment;SRF project - NOAA
Construction FA issued for treatment at Garzoli Well
5/29/15 (JSD): P84 construction funding project complete as of 3/09/15. 2/13/15 (JSD): P84 construction funding project is almost 100% complete
Well 13 and Well 09A are in violation of the arsenic MCL, RAA 0.022 to 0.032 mg/L
Well 06 and Well 07 are in violation of the arsenic MCL, RAA of both wells in 0.014 mg/L
5/29/15 (JSD): SRF funding project is on hold due to RTC. Waiting for issuance of SRF Planning project pending adoption of new water rates by the DLCSD board
Arsenic MCL Violation of Well 7

Too far away from City of Bakersfield for consolidation
Considering arsenic removal treatment.
Will need to provide arsenic removal treatment.
Qtrly PN and sampling required
Installing arsenic treatment plant- Adsorptive media
2/2/15 (JSD): Phase 1 of P84 project included drilling a new well (Well 09) and Phase 2 of the project included construction of arsenic adsorption treatment plant and a new 750,000-gallon tank for blending of treated water and a portion of bypassed water from Well 09
Proposal already submitted to provide arsenic removal
Drilling new wells and proposal to provide arsenic.
Drill a new well and evaluate treatment if the new well is not successful
Plan to develop a arsenic blending plan with other low arsenic wells.

System was in receivership due to federal Court Order. CalAm took over system in 2008 and immediately started to address arsenic issue. Plant is constructed and permit being processed. No enforcement issued as long as CalAm continues to work towards compliance.	9/30/2010
SRF project should be completed by the end of 2010.	10/7/2010

	SRF project - NOAA

01/19/16 (JSD): The Water Company is in the process of completing the online application for construction funding, via FFAST. 10/05/15 (JSD): Funding agreement was amended in Aug. 2015 to allow additional \$10,000. Planning project completion documents received from the engineer; DDW filed its project completion on 10/05/15; next step for the water system would be to go online and complete a construction funding application via FFAST. 5/29/15 (JSD): P84 planning project completion deadline is 6/18/15. Waiting for amendment to the funding agreement to allow additional \$10,000. P84 planning project is almost complete; arsenic blending treatment to be provided

Proposed project - unknown funding source

Submitting Application for SRF
Invited to apply for Prop 84
Prop 84 Planning and Feasibility turned down because they did not want to consolidate. Plan to apply to SRF
Prop 84 Planning and feasibility FA issued
Not applicable
Preapplication submitted

Central treatment installed and operating as of May 2008.

Quarterly monitoring, public notice

Quarterly monitoring, public notice

camp currently closed as a result of operational problems; all users moved to Acton Rehabilitation Center

None. Just submitted application.

Arsenic treatment installed. Arsenic sample taken post treatment on 7/12/2011 is ND. Treatment has been online since 6/17/2011.

Evaluating consolidation, new source, treatment.

Consolidation Project/New Well/Treatment

Blending Successfully. Operation and Maintenance Plan Reviewed and Approved.

Blending treatment - introduction of a surface water source to further blend down the arsenic concentration in the water delivered to the customers.

Treatment installed and being commissioned in place.

<p><b>9/22/15</b> - funding agreement issued on 9/10/15. DFA &amp; DDW will be meeting with system to start project. City of Colusa has already annexed the area. The project is to replace the old distribution system and incorporate Del Oro into the City system. This will not happen until the distribution system in is replaced. However, water is bing supplied by Colusa and Del Oro is meeting the Arsenic standard.</p> <p><b>7/3/2015</b> - Waiting for funding agreement.</p> <p>Waiting for Funding Agreement for Planning study. Consolidation with City of Colusa to occur - planning study for sewer and purchase negotiations between Del Oro &amp; City.</p>	<b>6/30/2012</b>
	<b>7/30/2012</b>
Interim treatment station is providing water that meets arsenic MCL. Consolidation with CVWD pending.	<b>8/6/2012</b>

Problem solved
Arsenic is above MCL in the only active well.
Problem solved
Problem solved
City has submitted an application for funding thru SDWSRF.
P84-In construction to consolidate with CalAm Ambler Park system
Was in SRF, requested bypass

Each service connection has a POU RO device which reduces the arsenic level to below 10 ug/L
Coagulation/filtration
System is non-communicative. LPA has been focusing on bacteriological monitoring violations.
Coagulation/filtration
Adsorptive media (GFH)
The system has submitted a corrective action plan. They are exploring treatment options.
Point of Entry Treatment
Q. PON Bottled Water & As. As testing distribution 2x/mo. & 1x/mo. source
NOV issued w/ cc to CDPH and EPA
Recently drilled new well, water quality testing meets standards, undergoing testing to determine if water meets quantity standards. Q. PON As. Q. As testing
Invited to apply to SRF-planning to drill well, plan is to wait for granite ridge project and funding. Q.PON As.
NOV issued w/ cc to CDPH and EPA; system applied for funding; 2/23/09- Russ Hatch indicated that the system plans to go with an arsenic removal plant; also he said he is aware of the "shovel ready" funding application deadline and will apply; system remains on quarterly public notification; 2/25/10- system submitted application to State for conversion of SRF application for construction funds to planning funds

No	2Q/2016 - 15

Upon approval by EHD, the plan shall be implemented and water served shall meet standards by 1/31/2010
System did not update its SRF application.
No SRF application
Safe Drinking Water State Revolving Fund Project NO 3301755-001. Final plans and specifications for consolidation planning project approved.

PON As, Q. As
Fe/Mn plant was modified to include As. Treatment. Q. PON As. Q. As testing
PN. Arsenic removal treatment installed & permit being processed.
Arsenic treatment plant installed and operational.
The well has been reconstructed in an attempt to meet the As MCL. However, this was not effective. The water system has been pursuing consolidation with another nearby public water system, but has not yet been successful.
This well will be converted to emergency standby source.
2/18/2016. Filtering system was installed. First sampling results submitted on 3/16/2016. Results were non detect. A three month sampling to be conducted to evaluate proper function of sytem. 2/18/2016: Plans for filtering system were approved. Installation will take place 2/29/2016. 1/15/2016: Plans for a filtering treatment submitted. Original compliance plan submitted to LPA September 30th, 2010. Compliance plan was changed in 2014 to blending plan. Proposed solution was a blending plan which was approved by District Engineer and LPA 7/17/2015. Some efforts were made to implement plan, but was not implemented. On 10/23/2015 representative informed DEH that they will be looking into a filtering system. Plans will be submitted within the next week. 7/26/2016 Filtering system was installed. The system appears to be working. Last two quarters have been ND. The RAA is below the MCL. Returned to compliance on 7/27/16.
Interim treatment has been installed. Consolidation with Coachella Valley Water District Pending. CDPH has reviewed and approved plans, specifications, notice of exemption and agreement documents.
Tier 2 arsenic notifications issued. Owner has approved plans to downsize park and reclassify as a State Small with POU treatment. Construction of new park in progress

	Universal preapplication. Need income survey to demonstrate disadvantaged community status.

Funding project nearing completion. Arsenic treatment plant has been online since September 2014. Treated water meets the arsenic standard.
N/A
Applied for SRF for source capacity issues
Project to provide treatment on SRF-Project Priority List in Category L. (Needs to be changed to Category G.)
Funding agreement executed.
Arsenic MCL
Only well arsenic RAA = 26 µg/L.
No SRF application
Only well arsenic RAA = 15 µg/L.

Wrote violation letter. Response by system was to take well out of service and place in standby status.

PN required, existing treatment plant was re-engineered and construction was completed in September 2014.

Blending problematic w/ drought, so will be trying filtration soon

PN & qtrly monitoring.

The City has not used Well 13 since July 2008 and is considering submitting a request to change the well to emergency standby source status.

hope RAA stays below MCL

Consolidate with the City of Santa Rosa

System has applied for Prop 84 funds to consolidate

	4/22/2015
Current treated water running annual average is at 0.003 mg/L.	4/24/2015
They were in compliance until the drought hit about the 3rd quarter last year. The system installed a gravity fed resin bed filter, which has been working and sampling monthly. The November 2015 sample is ND.	5/1/2015
	5/4/2015
	5/8/2015
	5/13/2015
Waiting for submittal of pilot study report to approve treatment plant and return system into compliance. Due to be submitted by 5/1/15 and system should return into compliance by 7/1/2015.	5/18/2015
Tier 2 arsenic notifications issued quarterly. Well is sampled quarterly for arsenic. Water system is a packing house that serves approximately 80 employees. System is classified as non-transient, non community	6/9/2015
9/22/15 - New well and Treatment plant function producing water in compliance. 6/30/2015 - New well and TP installed. Will RTC - with future quarterly monitoring results. In Construction. RTC required by 6/30/15	6/30/2015
10/05/15 (JSD): Arsenic treatment is operating successfully; returned the system to compliance as of 6/30/15. 5/29/15 (JSD): System expected to return to compliance in second Qtr. 2015. 2/13/15 (JSD): Expected to return to compliance during second quarter of 2015.	6/30/2015

Consolidation with the City of Santa Rosa
adsorption treatment or interconnection. Interconnection is preferred, but if other water system doesn't agree, treatment plan has been approved and can be installed within 120 days.
POE installed
System proposing to install adsorption media treat
System successfully piloted adsorption media treatment.
Consolidating with the City of Petaluma.
Consolidation with the City of Santa Rosa

10/05/15 (JSD): Returned to compliance as of 6/30/15. 5/29/15 (JSD): P84 construction project is complete as of 3/06/15; arsenic removal treatment and blending treatment being provided. RTC expected in 2nd qtr. of 2015. 2/13/15 (JSD): P84 project is expected to be completed by end of February 2015.	6/30/2015
Pilot study began in May 2015. System should be found in compliance by 7/1/2015.	7/17/2015
<b>7/29/15 update:</b> Approval to operate arsenic treatment given 3/4/15. Current 4QRAA is 6.3 ug/L. Will RTC system eff 8/1/15.	8/1/2015
<b>9/22/15</b> - Treatment plant went on line 8/25/2015. Going to take a raw water sample to show compliance with the Arsenic standard. Moved intake downstream where arsenic level is below standard. Project also involved replacing the surface water treatment plant at a new location. Once sufficient monitoring has taken place the system will be returned to compliance. <b>7/2/2015</b> - Treatment plant construction well underway. Currently project completion is projected to be the end of September 2015 and the system producing water with arsenic levels below the MCL.	8/25/2015
9/21/2015: RTC - Sept 2015; As trt installed. CO issued Q1 2015	9/1/2015
POU units have been installed on 26 connections. RTC after 4 QRAA < MCL. <b>7/29/15 update:</b> 4QRAA with POU in place for one quarter is 23.5 ug/L. Anticipate RTC by end of 3rd Q 2015.	9/9/2015
Currently in the process of reviewing the surface water system documentation and plans	9/18/2015

	#N/A
Results of Pilot Study	CA05
4QRAA < MCL after treatment installed	CA02
Switched to new source intake location on 8/25/15. Sample collected on 9/12/15 from new location was "non-detect" for arsenic. Another sample collected in October 2015 from new location was 2 ppb.	CA02
RAA < MCL - Treatment Installed	CA05
RAA < MCL - Treatment Installed (POU)	#N/A
Converted over to a surface water treatment plant. Inspection was performed by the LPA to confirm construction was performed according to approved plans. A new State permit will be issued.	#N/A
